

KURV ETF TRUST

STATEMENT OF ADDITIONAL INFORMATION

Dated June 13, 2025

This Statement of Additional Information (“SAI”) is not a prospectus, and should be read in conjunction with the Prospectus of Kurv ETF Trust (“Trust”) dated June, 13, 2025, (the “Prospectus”) for the following series of the Trust (each a “Fund” and, collectively, the “Funds”), as it may be supplemented from time to time:

| Fund | Ticker Symbol | Listing Exchange |
|-----------------------------------|--------------------------|-------------------------|
| Kurv Gold Enhanced Income ETF | KGLD | Cboe BZX Exchange, Inc. |
| Kurv Silver Enhanced Income ETF | KSLV | Cboe BZX Exchange, Inc. |
| Kurv Platinum Enhanced Income ETF | KPTN | Cboe BZX Exchange, Inc. |

A copy of each Fund’s Prospectus, SAI, Annual Report, and Semi-Annual Report may be obtained without charge by writing to the Trust or the Trust’s Administrator, U.S. Bancorp Fund Services, LLC (the “Administrator”), located at 615 East Michigan Street, Milwaukee, WI 53202 or by calling 1-833-955-KURV (5878).

References to the Investment Company Act of 1940, as amended, or other applicable law, will include any rules promulgated thereunder and any guidance, interpretations or modifications by the Securities and Exchange Commission (“SEC”), SEC staff or other authority with appropriate jurisdiction, including court interpretations, and exemptive, no action or other relief or permission from the SEC, SEC staff or other authority.

GENERAL DESCRIPTION OF THE TRUST

The Trust is an open-end management investment company. The Trust consists of 12 separate investment portfolios, with the following 3 Kurv Precious Metal ETFs being described in this SAI:

- Kurv Gold Enhanced Income ETF (the “Gold Fund”)
- Kurv Silver Enhanced Income ETF (the “Silver Fund”)
- Kurv Platinum Enhanced Income ETF (the “Platinum Fund”)
(each a “Fund” and, collectively, the “Funds”)

The remaining series are described in separate SAIs.

Each Fund is a non-diversified management investment company under the Investment Company Act of 1940, as amended (together with the rules and regulations adopted thereunder, as amended, the “1940 Act”). Each Fund is actively managed. The Trust was organized as a Delaware statutory trust on July 2, 2019. The Trust is governed by its Board of Trustees (the “Board”). The offering of each Fund’s shares (“Shares”) is registered under the Securities Act of 1933, as amended (the “Securities Act”). Kurv Investment Management LLC (the “Adviser”) is the investment adviser to each Fund.

Each Fund offers and issues Shares at their net asset value (“NAV”) only in aggregations of a specified number of Shares (each, a “Creation Unit”), generally in exchange for a basket of securities (the “Deposit Securities”) together with a deposit of a specified cash payment (the “Cash Component”). Alternatively, each Fund may also issue and redeem Creation Units in exchange for a specified all-cash payment (“Deposit Cash”). Each Fund’s shares are listed on the exchange indicated above (the “Exchange”) and trade on the Exchange at market prices that may differ from the Shares’ NAV. Shares are also redeemable only in Creation Unit aggregations, primarily for a basket of Deposit Securities together with a Cash Component. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, Shares are not redeemable securities.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the value of the missing Deposit Securities or Deposit Cash (collectively, the “Fund Deposit”), as set forth in the Participant Agreement (as defined below). The Trust may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the Securities and Exchange Commission (“SEC”) applicable to management investment companies offering redeemable securities. As in the case of other publicly traded securities, brokers’ commissions on transactions in the secondary market will be based on negotiated commission rates at customary levels.

INVESTMENT POLICIES AND RISKS

A discussion of the risks associated with an investment in a Fund is contained in the Prospectus under the headings “Summary Information—Principal Investment Strategies of a Fund” with respect to the applicable Fund, “Summary Information—Principal Risks of Investing in a Fund”

with respect to the applicable Fund and “Additional Information About a Fund’s Investment Strategies and Risks.” The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

General Considerations and Risks

An investment in a Fund should be made with an understanding that the value of a Fund’s portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

The existence of a liquid trading market for certain securities may depend on whether dealers will make a market in such securities. There can be no assurance that a market will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of a Fund’s Shares will be adversely affected if trading markets for a Fund’s portfolio securities are limited or absent or if bid/ask spreads are wide.

The Adviser, on behalf of each Fund, will file with the National Futures Association (“NFA”) a notice claiming an exclusion from the definition of the term “commodity pool operator” (“CPO”) under the Commodity Exchange Act, as amended (“CEA”), and the rules of the Commodity Futures Trading Commission (“CFTC”) promulgated thereunder, with respect to a Fund’s operations. Therefore, each Fund and the Adviser are not subject to registration or regulation as a commodity pool or CPO under the CEA. If a Fund becomes subject to these requirements, as well as related NFA rules, the Fund may incur additional compliance and other expenses.

Active Management Risk

Each Fund is actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, which may cause a Fund to fail to meet its investment objective or to underperform its benchmark index or funds with similar investment objectives and strategies. Furthermore, active trading that can accompany active management may result in high portfolio turnover, which may have a negative impact on performance. Active trading may result in higher brokerage costs or mark-up charges, which are ultimately passed on to shareholders of a Fund. Active trading may also result in adverse tax consequences.

Authorized Participant Concentration

Only an Authorized Participant (as defined in the Creations and Redemptions section of the Funds’ prospectus) may engage in creation or redemption transactions directly with a Fund. A Fund has a limited number of institutions that act as Authorized Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to a Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund Shares may trade at a discount to NAV and possibly face trading halts and/or delisting.

Borrowing

Each Fund may borrow money to the extent permitted under the 1940 Act, as interpreted or modified by regulation from time to time. This means that, in general, a Fund may borrow money from banks for any purpose in an amount up to 1/3 of the Fund's total assets. Each Fund also may borrow money for temporary administrative purposes in an amount not to exceed 5% of a Fund's total assets.

Specifically, provisions of the 1940 Act require a Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of a Fund's total assets made for temporary purposes. Any borrowings for temporary purposes in excess of 5% of a Fund's total assets must maintain continuous asset coverage. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, a Fund may be required to sell some of its portfolio holdings within three (3) days (not including Sundays and holidays) to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time.

Borrowing will tend to exaggerate the effect on the Fund's NAV of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by appreciation of the securities purchased. In addition, a Fund may be required to maintain minimum average balances in connection with such borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Collateral Securities Risk

Some of a Fund's assets may be allocated to Collateral that may include but are not limited to bills, notes, bonds, and other obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities, money market instruments and corporate debt securities, such as commercial paper. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government. Although a Fund may hold securities guaranteed by the U.S. government guarantees, such guarantees do not extend to shares of the Fund and only apply to the timely payment of interest and principal when held to maturity. U.S. government securities are subject to market risk, interest rate risk, and credit risk. To the extent that a Fund invests in money market instruments, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' management fees and other expenses. It is possible to lose money by investing in money market instruments. If a Fund invests in corporate debt securities the value of an investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of debt securities. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Corporate debt securities carry other risk factors such as credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). Some corporate debt securities that are rated below investment-grade or "junk" generally are considered speculative and may be particularly

susceptible to economic downturns, adverse financial conditions and the issuer's failure to make timely interest and principal payments.

Concentration Risk

A Fund's net asset value may fluctuate more than that of a fund that does not concentrate in a particular industry or group of industries.

Costs of Buying or Selling Shares Risk

Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if a Fund's Shares have more trading volume and market liquidity and higher if a Fund's Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

Counterparty Risk

A Fund may invest in financial instruments involving counterparties for the purpose of attempting to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. Such financial instruments may include, among others, total return, index, interest rate, and credit default swap agreements. The use of swap agreements and similar instruments exposes a Fund to risks that are different than those associated with ordinary portfolio securities transactions. For example, a Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If a counterparty defaults on its payment obligations to a Fund, this default will cause the value of your investment in a Fund to decrease. In addition, a Fund may enter into swap agreements with a limited number of counterparties, which may increase a Fund's exposure to counterparty credit risk. Similarly, if the credit quality of an issuer or guarantor of a debt instrument improves, this change may adversely affect the value of a Fund's investment.

Credit Risk

Credit risk is the risk that a Fund could lose money if an issuer or guarantor of a debt instrument becomes unwilling or unable to make timely principal and/or interest payments, or to otherwise meet its obligations. Each Fund is also subject to the risk that its investment in a debt instrument could decline because of concerns about the issuer's credit quality or perceived financial condition.

Fixed income securities are subject to varying degrees of credit risk, which are sometimes reflected in credit ratings.

Cybersecurity and Disaster Recovery Risks

In connection with the increased use of technologies such as the Internet and the dependence on computer systems to perform necessary business functions, a Fund is susceptible to operational, information security, and related risks due to the possibility of cyber-attacks or other incidents. Cyber incidents may result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, infection by computer viruses or other malicious software code, gaining unauthorized access to systems, networks, or devices that are used to service a Fund's operations through hacking or other means for the purpose of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks (which can make a website unavailable) on a Fund's website. In addition, authorized persons could inadvertently or intentionally release confidential or proprietary information stored on a Fund's systems.

Cybersecurity failures or breaches by a Fund's third party service providers (including, but not limited to, the adviser, distributor, custodian, transfer agent, and financial intermediaries) may cause disruptions and impact the service providers' and a Fund's business operations, potentially resulting in financial losses, the inability of Fund shareholders to transact business and the mutual funds to process transactions, inability to calculate a Fund's net asset value, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. Each Fund and its shareholders could be negatively impacted as a result of successful cyber-attacks against, or security breakdowns of, a Fund or its third-party service providers.

A Fund may incur substantial costs to prevent or address cyber incidents in the future. In addition, there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, a Fund cannot directly control any cybersecurity plans and systems put in place by third party service providers. Cybersecurity risks are also present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause a Fund's investment in such securities to lose value.

Derivatives Risk

Derivatives are financial instruments whose values are based on the value of one or more indicators, such as a security, asset, currency, interest rate, or index. Each Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying indicator, a derivative does not carry the same rights as would be the case if a Fund invested directly in the underlying securities.

The SEC adopted new regulations governing the use of derivatives by registered investment companies ("Rule 18f-4"). Rule 18f-4 imposes limits on the amount of derivatives a Fund can

enter into, treats derivatives as senior securities and if a Fund's use of derivatives is more than a limited specified exposure amount, requires the Fund to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

Tax Risk of Derivatives

Each Fund may invest in derivatives. The federal income tax treatment of a derivative may not be as favorable as a direct investment in an underlying asset. Derivatives may produce taxable income and taxable realized gain. Derivatives may adversely affect the timing, character and amount of income a Fund realizes from its investments. As a result, a larger portion of a Fund's distributions may be treated as ordinary income rather than as capital gains. In addition, certain derivatives are subject to mark-to market or straddle provisions of the Code. If such provisions are applicable, there could be an increase (or decrease) in the amount of taxable dividends paid by a Fund.

Distribution Risk

As part of a Fund's investment objective, the Fund seeks to provide current monthly income. There is no assurance that a Fund will make a distribution in any given month. If a Fund does make distributions, the amounts of such distributions will likely vary greatly from one distribution to the next. Additionally, the monthly distributions, if any, may consist of returns of capital, which would decrease the Fund's NAV and trading price over time. As a result, an investor may suffer significant losses to their investment.

Exchange-Traded Product Risk

The Funds invest ETPs. Through its positions in ETPs, a Fund generally will be subject to the risks associated with such vehicle's investments, or reference assets/benchmark components in the case of ETNs, including the possibility that the value of the securities or instruments held by or linked to an ETP could decrease. Certain of the ETPs may hold common portfolio positions, thereby reducing any diversification benefits. The majority of the ETPs in which the Funds invest are pooled investment vehicles that are not registered pursuant to the 1940 Act and, therefore, are not subject to the regulatory scheme of the 1940 Act including the investor protections afforded by the 1940 Act. Under normal market conditions, the Funds will purchase shares of or interest in ETPs in the secondary market. When a Fund invests in an ETP (except an ETN), in addition to directly bearing the expenses associated with its own operations, it also will bear a pro rata portion of the ETP's expenses (including operating costs and management fees). Because ETNs are debt securities and not pools of securities, the Funds pay a specific investor fee for its investments in ETNs. Consequently, an investment in the Funds entails more direct and indirect expenses than a direct investment in an ETP.

Fixed Income Securities

A Fund may invest in fixed income securities. The market value of fixed income investments will change in response to interest rate changes and other factors. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the values of such securities generally decline. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are

also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities but will affect an investing Fund's NAV. Additional information regarding fixed income securities is described below.

Duration

Duration is a measure of the expected change in value of a fixed income security for a given change in interest rates. For example, if interest rates changed by one percent, the value of a security having an effective duration of two years generally would vary by two percent. Duration takes the length of the time intervals between the present time and time that the interest and principal payments are scheduled, or in the case of a callable bond, expected to be received, and weighs them by the present values of the cash to be received at each future point in time.

Creditor Liability and Participation on Creditors' Committees

Generally, when a Fund holds bonds or other similar fixed income securities of an issuer, the Fund becomes a creditor of the issuer. If a Fund is a creditor of an issuer it, may be subject to challenges related to the securities that it holds, either in connection with the bankruptcy of the issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself. A Fund may from time to time participate on committees formed by creditors to negotiate with the management of financially troubled issuers of securities held by a Fund. Such participation may subject a Fund to expenses such as legal fees and may make a Fund an "insider" of the issuer for purposes of the federal securities laws, and therefore may restrict a Fund's ability to trade in or acquire additional positions in a particular security when it might otherwise desire to do so. Participation by a Fund on such committees also may expose a Fund to potential liabilities under the federal bankruptcy laws or other laws governing the rights of creditors and debtors. A Fund will participate on such committees only when its Adviser believes that such participation is necessary or desirable to enforce a Fund's rights as a creditor or to protect the value of securities held by a Fund. Further, the Adviser has the authority to represent the Trust, or its Fund, on creditors' committees or similar committees and generally with respect to challenges related to the securities held by a Fund relating to the bankruptcy of an issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself.

Variable and Floating Rate Securities

Variable and floating rate instruments involve certain obligations that may carry variable or floating rates of interest, and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates which are not fixed, but which vary with changes in specified market rates or indices. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period, and may have a set floor or ceiling on interest rate changes. There is a risk that the current interest rate on such obligations may not accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

Bank Obligations

Bank obligations may include certificates of deposit, bankers' acceptances, and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third-party, although there is no market for such deposits. A Fund will not invest in fixed time deposits which (1) are not subject to prepayment or (2) provide for withdrawal penalties upon prepayment (other than overnight deposits) if, in the aggregate, more than 15% of its net assets would be invested in such deposits, repurchase agreements with remaining maturities of more than seven days and other illiquid assets. Subject to the Trust's limitation on concentration, as described in the "Investment Restrictions" section below, there is no limitation on the amount of a Fund's assets which may be invested in obligations of foreign banks which meet the conditions set forth herein.

Obligations of foreign banks involve somewhat different investment risks than those affecting obligations of U.S. banks, including the possibilities that their liquidity could be impaired because of future political and economic developments, that their obligations may be less marketable than comparable obligations of U.S. banks, that a foreign jurisdiction might impose withholding taxes on interest income payable on those obligations, that foreign deposits may be seized or nationalized, that foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations and that the selection of those obligations may be more difficult because there may be less publicly available information concerning foreign banks or the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign banks may differ from those applicable to United States banks. Foreign banks are not generally subject to examination by any United States Government agency or instrumentality.

Debt Securities

Fixed income securities are debt securities. A debt security is a security consisting of a certificate or other evidence of a debt (secured or unsecured) on which the issuing company or governmental body promises to pay the holder thereof a fixed, variable, or floating rate of interest for a specified length of time, and to repay the debt on the specified maturity date, as discussed above. Some debt securities, such as zero coupon bonds, do not make regular interest payments but are issued at a discount to their principal or maturity value. Debt securities include a variety of fixed income obligations, including, but not limited to, corporate debt securities, government securities, municipal securities, convertible securities, and mortgage-backed securities. Debt securities include investment-grade securities, non-investment-grade securities, and unrated securities. Debt

securities are subject to a variety of risks, such as interest rate risk, income risk, call/prepayment risk, inflation risk, credit risk, and currency risk.

Corporate Debt Securities

The Funds may invest in corporate debt securities representative of one or more high yield bond or credit derivative indices, which may change from time to time. Selection will generally be dependent on independent credit analysis or fundamental analysis performed by the Adviser. The Funds may invest in all grades of corporate debt securities, including below investment-grade securities, as discussed below. See Appendix A for a description of corporate bond ratings. The Funds also may invest in unrated securities.

Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower-ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Below Investment-Grade Debt Securities

The Funds may invest in below investment-grade securities. Below investment-grade securities, also referred to as “high yield securities” or “junk bonds,” are debt securities that are rated lower than the four highest rating categories by a nationally recognized statistical rating organization (for example, lower than Baa3 by Moody’s Investors Service, Inc. or (“Moody’s”) lower than BBB- by Standard & Poor’s (“S&P”)) or are determined to be of comparable quality by the Funds’ Adviser. These securities are generally considered to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation, and will generally involve more credit risk than securities in the investment-grade categories. Investment in these securities generally provides greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk.

Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of investment-grade securities. Thus, reliance on credit ratings in making investment decisions entails greater risks for high yield securities than for investment-grade debt securities. The success of a fund’s adviser in managing high yield securities is more dependent upon its own credit analysis than is the case with investment-grade securities.

Some high yield securities are issued by smaller, less-seasoned companies, while others are issued as part of a corporate restructuring, such as an acquisition, merger, or leveraged buyout. Companies that issue high yield securities are often highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with investment-grade securities. Some high yield securities were once rated as investment-grade but have been downgraded to junk bond status because of financial difficulties experienced by their issuers.

The market values of high yield securities tend to reflect individual issuer developments to a greater extent than do investment-grade securities, which in general react to fluctuations in the general level of interest rates. High yield securities also tend to be more sensitive to economic conditions than are investment-grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in junk bond prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, a fund investing in such securities may incur additional expenses to seek recovery.

The secondary market on which high yield securities are traded may be less liquid than the market for investment-grade securities. Less liquidity in the secondary trading market could adversely affect the ability of a fund to sell a high yield security or the price at which a fund could sell a high yield security, and could adversely affect the daily NAV of fund shares. When secondary markets for high yield securities are less liquid than the market for investment-grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available.

The Funds will not necessarily dispose of a security if a credit-rating agency downgrades the rating of the security below its rating at the time of purchase. However, the Adviser will monitor the investment to determine whether continued investment in the security is in the best interest of shareholders.

Fluctuation of Net Asset Value

The net asset value (“NAV”) of each Fund’s Shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply and demand for Shares on the Exchange. The Adviser cannot predict whether the Shares will trade below, at or above the NAV of the Shares of a Fund. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Shares will be closely related to, but not identify to, the same forces influencing the prices of the stocks of a Fund’s Index trading individually or in the aggregate at any point in time.

Foreign Securities

An investment in a Fund involves risks similar to those of investing in portfolios of equity securities traded on non-U.S. exchanges. These risks include market fluctuations caused by such factors as economic and political developments and changes in interest rates and perceived trends in stock prices. Investing in securities issued by issuers domiciled in countries other than the domicile of the investor and denominated in currencies other than an investor’s local currency entails certain considerations and risks not typically encountered by the investor in making investments in its home country and in that country’s currency. These considerations include favorable or unfavorable changes in interest rates, currency exchange rates, exchange control regulations and the costs that may be incurred in connection with conversions between various currencies. Investing in a Fund also involves certain risks and considerations not typically associated with investing in a fund whose portfolio contains exclusively securities of U.S. issuers. These risks include generally less liquid and less efficient securities markets; generally greater price volatility; less publicly available information about issuers; the imposition of withholding or other taxes; the imposition of restrictions on the expatriation of funds or other assets of a Fund; higher transaction and custody costs; delays and risks attendant in settlement procedures; difficulties in enforcing contractual obligations; lower liquidity and significantly smaller market capitalization; different accounting and disclosure standards; lower levels of regulation of the securities markets; more substantial government interference with the economy; higher rates of inflation; greater social, economic, and political uncertainty; the risk of nationalization or expropriation of assets; and the risk of war.

ADRs, GDRs and EDRs

The Funds may purchase equity securities of non-U.S. issuers. To the extent a Fund invests in equity securities of non-U.S. issuers, certain of the Fund’s investments in such securities may be in the form of American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”)

and European Depositary Receipts (“EDRs”) (collectively, “Depositary Receipts”). Depositary Receipts are receipts, typically issued by a bank or trust issuer, which evidence ownership of underlying securities issued by a non-U.S. issuer. For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a non-U.S. issuer. For other forms of Depositary Receipts, the depository may be a non-U.S. or a U.S. entity, and the underlying securities may be issued by a non-U.S. or a U.S. issuer. Depositary Receipts are not necessarily denominated in the same currency as their underlying securities. Generally, ADRs, issued in registered form, are designed for use in the U.S. securities markets, and EDRs, issued in bearer form, are designed for use in European securities markets. GDRs are tradable both in the United States and in Europe and are designed for use throughout the world.

Emerging Markets

Investments in emerging market countries may be subject to greater risks than investments in developed countries. These risks include: (i) less social, political, and economic stability; (ii) greater illiquidity and price volatility due to smaller or limited local capital markets for such securities, or low or non-existent trading volumes; (iii) foreign exchanges and broker-dealers may be subject to less scrutiny and regulation by local authorities; (iv) local governments may decide to seize or confiscate securities held by foreign investors and/or local governments may decide to suspend or limit an issuer’s ability to make dividend or interest payments; (v) local governments may limit or entirely restrict repatriation of invested capital, profits, and dividends; (vi) capital gains may be subject to local taxation, including on a retroactive basis; (vii) issuers facing restrictions on dollar or euro payments imposed by local governments may attempt to make dividend or interest payments to foreign investors in the local currency; (viii) investors may experience difficulty in enforcing legal claims related to the securities and/or local judges may favor the interests of the issuer over those of foreign investors; (ix) bankruptcy judgments may only be permitted to be paid in the local currency; (x) limited public information regarding the issuer may result in greater difficulty in determining market valuations of the securities, and (xi) lax financial reporting on a regular basis, substandard disclosure and differences in accounting standards may make it difficult to ascertain the financial health of an issuer.

Emerging market securities markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. In addition, brokerage and other costs associated with transactions in emerging market securities markets can be higher, sometimes significantly, than similar costs incurred in securities markets in developed countries. Although some emerging markets have become more established and tend to issue securities of higher credit quality, the markets for securities in other emerging market countries are in the earliest stages of their development, and these countries issue securities across the credit spectrum. Even the markets for relatively widely traded securities in emerging market countries may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these securities markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less

extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging market securities may also affect a Fund's ability to accurately value its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

Many emerging market countries suffer from uncertainty and corruption in their legal frameworks. Legislation may be difficult to interpret and laws may be too new to provide any precedential value. Laws regarding foreign investment and private property may be weak or non-existent. Sudden changes in governments may result in policies that are less favorable to investors such as policies designed to expropriate or nationalize "sovereign" assets. Certain emerging market countries in the past have expropriated large amounts of private property, in many cases with little or no compensation, and there can be no assurance that such expropriation will not occur in the future.

Investment in the securities markets of certain emerging market countries is restricted or controlled to varying degrees. These restrictions may limit a Fund's investment in certain emerging market countries and may increase the expenses of the Fund. Certain emerging market countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the company available for purchase by nationals.

Many emerging market countries lack the social, political, and economic stability characteristic of the United States. Political and social instability among emerging market countries can be common and may be caused by an uneven distribution of wealth, social unrest, labor strikes, civil wars, and religious oppression. Economic instability in emerging market countries may take the form of: (i) high interest rates; (ii) high levels of inflation, including hyperinflation; (iii) high levels of unemployment or underemployment; (iv) changes in government economic and tax policies, including confiscatory taxation; and (v) imposition of trade barriers.

A Fund's income and, in some cases, capital gains from foreign securities will be subject to applicable taxation in certain of the emerging market countries in which it invests, and treaties between the United States and such countries may not be available in some cases to reduce the otherwise applicable tax rates.

Emerging markets also have different clearance and settlement procedures, and in certain of these emerging markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions.

In the past, certain governments in emerging market countries have become overly reliant on the international capital markets and other forms of foreign credit to finance large public spending programs, which in the past have caused huge budget deficits. Often, interest payments have become too overwhelming for a government to meet, representing a large percentage of total GDP. These foreign obligations have become the subject of political debate and served as fuel for

political parties of the opposition, which pressure the government not to make payments to foreign creditors, but instead to use these funds for, among other things, social programs. Either due to an inability to pay or submission to political pressure, foreign governments have been forced to seek a restructuring of their loan and/or bond obligations, have declared a temporary suspension of interest payments or have defaulted. These events have adversely affected the values of securities issued by foreign governments and corporations domiciled in those countries and have negatively affected not only their cost of borrowing, but their ability to borrow in the future as well.

Foreign Currencies

The Funds may invest directly and indirectly in foreign currencies. The Funds may conduct foreign currency transactions on a spot (i.e., cash) or forward basis (i.e., by entering into forward contracts to purchase or sell foreign currencies). Currency transactions made on a spot basis are for cash at the spot rate prevailing in the currency exchange market for buying or selling currency. Although foreign exchange dealers generally do not charge a fee for such conversions, they do realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency at one rate, while offering a lesser rate of exchange should the counterparty desire to resell that currency to the dealer. When used for hedging purposes, forward currency contracts tend to limit any potential gain that may be realized if the value of a Fund's foreign holdings increases because of currency fluctuations.

Investments in foreign currencies are subject to numerous risks, not the least of which is the fluctuation of foreign currency exchange rates with respect to the U.S. dollar. Exchange rates fluctuate for a number of reasons.

- **Inflation.** Exchange rates change to reflect changes in a currency's buying power. Different countries experience different inflation rates due to different monetary and fiscal policies, different product and labor market conditions, and a host of other factors.
- **Trade Deficits.** Countries with trade deficits tend to experience a depreciating currency. Inflation may be the cause of a trade deficit, making a country's goods more expensive and less competitive and so reducing demand for its currency.
- **Interest Rates.** High interest rates may raise currency values in the short term by making such currencies more attractive to investors. However, since high interest rates are often the result of high inflation, long-term results may be the opposite.
- **Budget Deficits and Low Savings Rates.** Countries that run large budget deficits and save little of their national income tend to suffer a depreciating currency because they are forced to borrow abroad to finance their deficits. Payments of interest on this debt can inundate the currency markets with the currency of the debtor nation. Budget deficits also can indirectly contribute to currency depreciation if a government chooses inflationary measures to cope with its deficits and debts.

- **Political Factors.** Political instability in a country can cause a currency to depreciate. Demand for a certain currency may fall if a country appears a less desirable place in which to invest and do business.
- **Government Control.** Through their own buying and selling of currencies, the world's central banks sometimes manipulate exchange rate movements. In addition, governments occasionally issue statements to influence people's expectations about the direction of exchange rates, or they may instigate policies with an exchange rate target as the goal. The value of a Fund's investments is calculated in U.S. dollars each day that the New York Stock Exchange ("NYSE") is open for business. As a result, to the extent that a Fund's assets are invested in instruments denominated in foreign currencies and the currencies appreciate relative to the U.S. dollar, the Fund's NAV as expressed in U.S. dollars (and, therefore, the value of your investment) should increase. If the U.S. dollar appreciates relative to the other currencies, the opposite should occur. The currency-related gains and losses experienced by a Fund will be based on changes in the value of portfolio securities attributable to currency fluctuations only in relation to the original purchase price of such securities as stated in U.S. dollars. Gains or losses on Shares of a Fund will be based on changes attributable to fluctuations in the NAV of such Shares, expressed in U.S. dollars, in relation to the original U.S. dollar purchase price of the Shares. The amount of appreciation or depreciation in a Fund's assets also will be affected by the net investment income generated by the money market instruments in which the Fund invests and by changes in the value of the securities that are unrelated to changes in currency exchange rates.

The Funds may incur currency exchange costs when it sells instruments denominated in one currency and buys instruments denominated in another.

Forward Contract Risk

Forward contracts involve the purchase or sale of a specific quantity of a government security at a specified price, with delivery and settlement at a specified future date. Forward contracts, unlike futures contracts, are not traded on exchanges and are not standardized; rather, banks and dealers act as principals in these markets, negotiating each transaction on an individual basis. The principals who deal in the forward markets are not required to continue to make markets in the currencies or commodities they trade and these markets can experience periods of illiquidity, sometimes of significant duration. There have been periods during which certain participants in these markets have refused to quote prices for certain currencies or commodities or have quoted prices with an unusually wide spread between the price at which they were prepared to buy and that at which they were prepared to sell.

Futures and Options

A Fund may enter into futures contracts and options that are traded on a U.S. or non-U.S. exchange. A Fund will not use futures or options for speculative purposes. A Fund may enter into certain equity, index and currency futures transactions, as well as other futures transactions that become available in the markets. By using such futures contracts, the Funds may obtain exposure to certain

equities, indexes and currencies without actually investing in such instruments. Index futures may be based on broad indices, such as the S&P 500 Index, or narrower indices.

Risk of Futures and Options

There are several risks accompanying the utilization of futures contracts and options on futures contracts. A position in futures contracts and options on futures contracts may be closed only on the exchange on which the contract was made (or a linked exchange). While a Fund plans to utilize futures contracts only if an active market exists for such contracts, there is no guarantee that a liquid market will exist for the contract at a specified time. In the event of adverse price movements, a Fund would continue to be required to make daily cash payments to maintain its required margin. In such situations, if a Fund has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements at a time when it may be disadvantageous to do so. In addition, a Fund may be required to deliver the instruments underlying the futures contracts it has sold.

The risk of loss in trading futures contracts or uncovered call options in some strategies (e.g., selling uncovered stock index futures contracts) is potentially unlimited. A Fund does not plan to use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit. A Fund, however, intend to utilize futures and options contracts in a manner designed to limit their risk exposure to levels comparable to a direct investment in the types of stocks in which they invest.

There is a risk of loss by a Fund of the initial and variation margin deposits in the event of bankruptcy of the FCM with which the Fund has an open position in a futures contract. The assets of a Fund may not be fully protected in the event of the bankruptcy of the FCM or central counterparty because a Fund might be limited to recovering only a pro rata share of all available funds and margin segregated on behalf of an FCM's customers. If the FCM does not provide accurate reporting, a Fund is also subject to the risk that the FCM could use a Fund's assets, which are held in an omnibus account with assets belonging to the FCM's other customers, to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty.

There is also the risk of loss of margin deposits in the event of bankruptcy of a broker with whom a Fund has an open position in the futures contract or option. The purchase of put or call options will be based upon predictions by the Adviser as to anticipated trends, which predictions could prove to be incorrect.

Because the futures market generally imposes less burdensome margin requirements than the securities market, an increased amount of participation by speculators in the futures market could result in price fluctuations. Certain financial futures exchanges limit the amount of fluctuation permitted in futures contract prices during a single trading day. The daily limit establishes the maximum amount by which the price of a futures contract may vary either up or down from the previous day's settlement price at the end of a trading session. Once the daily limit has been

reached in a particular type of contract, no trades may be made on that day at a price beyond that limit. It is possible that futures contract prices could move to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and subjecting a Fund to substantial losses. In the event of adverse price movements, a Fund would be required to make daily cash payments of variation margin.

Call Writing Strategy Risks

The path dependency (i.e., the continued use) of a Fund's call writing strategy will impact the extent that the Fund participates in the positive price returns of the underlying stock and, in turn, the Fund's returns, both during the term of the sold call options and over longer time periods. If, for example, each month a Fund were to sell 7% out-of-the-money call options having a one-month term, the Fund's participation in the positive price returns of the underlying stock will be capped at 7% in any given month. However, over a longer period (e.g., 5 months), the Fund should not be expected to participate fully in the first 35% (i.e., 5 months x 7%) of the positive price returns of the underlying stock, or the Fund may even lose money, even if the underlying stock share price has appreciated by at least that much over such period, if during any month over that period the underlying stock had a return less than 7%. This example illustrates that both the Fund's participation in the positive price returns of an underlying stock and its returns will depend not only on the price of the underlying stock but also on the path that such stock takes over time.

Covered Call Option Writing Risk

By writing covered call options, in return for the receipt of premiums, a Fund will give up the opportunity to benefit from potential increases in the value of the underlying stock above the exercise prices of such options, but will continue to bear the risk of declines in the value of the underlying stock. The premiums received from the options may not be sufficient to offset any losses sustained from the volatility of the underlying stocks over time. In addition, the Fund's ability to sell the securities underlying the options will be limited while the options are in effect unless the Fund cancels out the option positions through the purchase of offsetting identical options prior to the expiration of the written options. Exchanges may suspend the trading of options in volatile markets. If trading is suspended, the Fund may be unable to write options at times that may be desirable or advantageous to do so, which may increase the risk of tracking error.

Futures

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific asset, currency, rate or index at a specified future time and at a specified price. Stock index futures are based on investments that reflect the market value of common stock of the firms included in an underlying index. A Fund may enter into futures contracts to purchase securities indexes when the Adviser anticipates purchasing the underlying securities and believes prices will rise before the purchase will be made. To the extent required by law, liquid assets committed to futures contracts will be maintained.

Some futures contracts are traded on organized exchanges regulated by the SEC or Commodity Futures Trading Commission ("CFTC"), and transactions on them are cleared through a clearing

corporation, which guarantees the performance of the parties to the contract. Futures contracts may be bought and sold on U.S. and non-U.S. exchanges. Futures contracts in the U.S. have been designed by exchanges that have been designated “contract markets” by the CFTC and must be executed through a futures commission merchant (“FCM”), which is a brokerage firm that is a member of the relevant contract market. Each exchange guarantees performance of the contracts as between the clearing members of the exchange, thereby reducing the risk of counterparty default. Futures contracts may also be entered into on certain exempt markets, including exempt boards of trade and electronic trading facilities, available to certain market participants. Because all transactions in the futures market are made, offset or fulfilled by an FCM through a clearinghouse associated with the exchange on which the contracts are traded, a Fund will incur brokerage fees when it buys or sells futures contracts.

Unlike purchases or sales of portfolio securities, no price is paid or received by a Fund upon the purchase or sale of a futures contract. Initially, a Fund will be required to deposit with the broker or in a segregated account with a custodian or sub-custodian an amount of liquid assets, known as initial margin, based on the value of the contract. The nature of initial margin in futures transactions is different from that of margin in security transactions in that futures contract margin does not involve the borrowing of funds by the customer to finance the transactions. Rather, the initial margin is in the nature of a performance bond or good faith deposit on the contract, which is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, called variation margin, to and from the broker, will be made on a daily basis as the price of the underlying instruments fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as “marking-to-market.” For example, when a Fund has purchased a futures contract and the price of the contract has risen in response to a rise in the underlying instruments, that position will have increased in value and the Fund will be entitled to receive from the broker a variation margin payment equal to that increase in value. Conversely, where a Fund has purchased a futures contract and the price of the future contract has declined in response to a decrease in the underlying instruments, the position would be less valuable, and the Fund would be required to make a variation margin payment to the broker. Prior to expiration of the futures contract, the Adviser may elect to close the position by taking an opposite position, subject to the availability of a secondary market, which will operate to terminate the Fund’s position in the futures contract. A final determination of variation margin is then made, additional cash is required to be paid by or released to the Fund, and the Fund realizes a loss or gain.

Unlike purchases or sales of portfolio securities, no price is paid or received by a Fund upon the purchase or sale of a futures contract. Initially, a Fund will be required to deposit with the broker or in a segregated account with a custodian or sub-custodian an amount of liquid assets, known as initial margin, based on the value of the contract. The nature of initial margin in futures transactions is different from that of margin in security transactions in that futures contract margin does not involve the borrowing of funds by the customer to finance the transactions. Rather, the initial margin is in the nature of a performance bond or good faith deposit on the contract, which is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, called variation margin, to and from the broker, will be made on a daily basis as the price of the underlying instruments fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as “marking-to-

market.” For example, when a Fund has purchased a futures contract and the price of the contract has risen in response to a rise in the underlying instruments, that position will have increased in value and the Fund will be entitled to receive from the broker a variation margin payment equal to that increase in value. Conversely, where a Fund has purchased a futures contract and the price of the future contract has declined in response to a decrease in the underlying instruments, the position would be less valuable, and the Fund would be required to make a variation margin payment to the broker. Prior to expiration of the futures contract, the Adviser may elect to close the position by taking an opposite position, subject to the availability of a secondary market, which will operate to terminate the Fund’s position in the futures contract. A final determination of variation margin is then made, additional cash is required to be paid by or released to the Fund, and the Fund realizes a loss or gain.

There are several risks in connection with the use of futures by a Fund. One risk arises because of the imperfect correlation between movements in the price of the futures and movements in the price of the instruments which are the subject of the hedge. The price of the future may move more than or less than the price of the instruments being hedged. If the price of the futures moves less than the price of the instruments which are the subject of the hedge, the hedge will not be fully effective but, if the price of the instruments being hedged has moved in an unfavorable direction, the Fund would be in a better position than if it had not hedged at all. If the price of the instruments being hedged has moved in a favorable direction, this advantage will be partially offset by the loss on the futures. If the price of the futures moves more than the price of the hedged instruments, the Fund involved will experience either a loss or gain on the futures, which will not be completely offset by movements in the price of the instruments that are the subject of the hedge. To compensate for the imperfect correlation of movements in the price of instruments being hedged and movements in the price of futures contracts, a Fund may buy or sell futures contracts in a greater dollar amount than the dollar amount of instruments being hedged if the volatility over a particular time period of the prices of such instruments has been greater than the volatility over such time period of the futures, or if otherwise deemed to be appropriate by the Adviser. Conversely, a Fund may buy or sell fewer futures contracts if the volatility over a particular time period of the prices of the instruments being hedged is less than the volatility over such time period of the futures contract being used, or if otherwise deemed to be appropriate by the Adviser.

In addition to the possibility that there may be an imperfect correlation, or no correlation at all, between movements in futures and the instruments being hedged, the price of futures may not correlate perfectly with movement in the cash market due to certain market distortions. Rather than meeting additional margin deposit requirements, investors may close futures contracts through off-setting transactions, which could distort the normal relationship between the cash and futures markets. Second, with respect to financial futures contracts, the liquidity of the futures market depends on participants entering into off-setting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortions. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market may also cause temporary price distortions. Due to the possibility of price distortion in the futures market, and because of the imperfect correlation between the movements in the cash market and movements

in the price of futures, a correct forecast of general market trends or interest rate movements by the Adviser may still not result in a successful hedging transaction over a short time frame.

In general, positions in futures may be closed out only on an exchange, board of trade or other trading facility that provides a secondary market for such futures. Although a Fund intends to purchase or sell futures only on trading facilities where there appear to be active secondary markets, there is no assurance that a liquid secondary market on any trading facility will exist for any particular contract or at any particular time. In such an event, it may not be possible to close a futures contract position, and in the event of adverse price movements, a Fund would continue to be required to make daily cash payments of variation margin. However, in the event futures contracts have been used to hedge portfolio securities, such securities may not be sold until the futures contract can be terminated. In such circumstances, an increase in the price of the securities, if any, may partially or completely offset losses on the futures contract. However, as described above, there is no guarantee that the price of the securities will in fact correlate with the price movements in the futures contract and thus provide an offset on a futures contract.

Further, it should be noted that the liquidity of a secondary market in a futures contract may be adversely affected by “daily price fluctuation limits” established by commodity exchanges, which limit the amount of fluctuation in a futures contract price during a single trading day. Once the daily limit has been reached in the contract, no trades may be entered into at a price beyond the limit, thus preventing the liquidation of open futures positions. The trading of futures contracts is also subject to the risk of trading halts, suspensions, exchange or clearing house equipment failures, government intervention, insolvency of a brokerage firm or clearing house or other disruptions of normal trading activity, which could at times make it difficult or impossible to liquidate existing positions or to recover excess variation margin payments.

Successful use of futures by a Fund is subject to the Adviser’s ability to predict correctly movements in the direction of the market. In addition, in such situations, if a Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. Such sales of securities may be, but will not necessarily be, at increased prices which reflect the rising market. A Fund may have to sell securities at a time when it may be disadvantageous to do so.

With respect to futures contracts that are contractually required to “cash-settle,” a Fund maintains liquid assets in an amount at least equal to a Fund’s daily marked-to-market obligation (i.e., a Fund’s daily net liability, if any), rather than the contracts’ notional value (i.e., the value of the underlying asset). By maintaining assets equal to its net obligation under cash-settled futures contracts, a Fund may employ leverage to a greater extent than if a Fund set aside assets equal to the futures contracts’ full notional value.

Options

A Fund may invest in put options and buy call options and write covered call and secured put options. Such options may relate to particular securities, foreign and domestic stock indices, financial instruments, foreign currencies or the yield differential between two securities and may or may not be listed on a domestic or foreign securities exchange or issued by the Options Clearing Corporation. A call option for a particular security or currency gives the purchaser of the option

the right to buy, and a writer the obligation to sell, the underlying security at the stated exercise price prior to the expiration of the option, regardless of the market price of the security or currency. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security or currency gives the purchaser the right to sell the security or currency at the stated exercise price prior to the expiration date of the option, regardless of the market price of the security or currency. In contrast to an option on a particular security, an option on an index provides the holder with the right to make or receive a cash settlement upon exercise of the option. The amount of this settlement will be equal to the difference between the closing price of the index at the time of exercise and the exercise price of the option expressed in dollars, times a specified multiple. Options trading is a highly specialized activity, which entails risk greater than ordinary investment risk. Options on particular securities may be more volatile than the underlying instruments and, therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. The Funds will write call options only if they are “covered.” In the case of a call option on a security or currency, the option is “covered” if the Fund owns the security or currency underlying the call or has an absolute and immediate right to acquire that security without additional cash consideration (or, if additional cash consideration is required, liquid assets in such amount are segregated) upon conversion or exchange of other securities held by it. For a call option on an index, the option is covered if the Fund maintains with its custodian a portfolio of securities substantially replicating the index, or liquid assets equal to the contract value. A call option also is covered if the Fund holds a call on the same security, currency or index as the call written where the exercise price of the call held is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the Fund segregates liquid assets in the amount of the difference.

All put options written by a Fund would be covered, which means that such Fund will segregate cash or liquid assets with a value at least equal to the exercise price of the put option or will use the other methods described in the next sentence. A put option also is covered if the Fund holds a put option on the same security or currency as the option written where the exercise price of the option held is (i) equal to or higher than the exercise price of the option written, or (ii) less than the exercise price of the option written, provided the Fund segregates liquid assets in the amount of the difference.

A Fund’s obligation to sell subject to a covered call option written by it, or to purchase a security or currency subject to a secured put option written by it, may be terminated prior to the expiration date of the option by the Fund’s execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (i.e., same underlying security or currency, exercise price and expiration date) as the option previously written. Such a purchase does not result in the ownership of an option. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying security or currency or to permit the writing of a new option containing different terms on such underlying security. The cost of such a liquidation purchase plus transaction costs may be greater than the premium received upon the original option, in which event the Fund will have incurred a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer, unable to effect a closing purchase transaction, will not be able to sell the underlying security or currency (in the case of a

covered call option) or liquidate the segregated assets (in the case of a secured put option) until the option expires or the optioned security or currency is delivered upon exercise with the result that the writer in such circumstances will be subject to the risk of market decline or appreciation in the instrument during such period.

When a Fund purchases an option, the premium paid by it is recorded as an asset of the Fund. When a Fund writes an option, an amount equal to the net premium (the premium less the commission) received by the Fund is included in the liability section of the Fund's statement of assets and liabilities as a deferred credit. The amount of this asset or deferred credit will be subsequently marked-to-market to reflect the current value of the option purchased or written. The current value of the traded option is the last sale price or, in the absence of a sale, the current bid price. If an option purchased by a Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If a Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by a Fund expires on the stipulated expiration date or if a Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold) and the deferred credit related to such option will be eliminated. If an option written by a Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

There are several risks associated with transactions in certain options. For example, there are significant differences between the securities, currency and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading volume; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Options on Futures Contracts

A Fund may purchase and write options on the futures contracts described above. A futures option gives the holder, in return for the premium paid, the right to receive and execute a long futures contract (if the option is a call) or a short futures contract (if the option is a put) at a specified price at any time during the period of the option. Like the buyer or seller of a futures contract, the holder, or writer, of an option has the right to terminate its position prior to the scheduled expiration of the option by selling, or purchasing an option of the same series, at which time the person entering

into the closing transaction will realize a gain or loss. A Fund will be required to deposit initial margin and variation margin with respect to put and call options on futures contracts written by it pursuant to brokers' requirements similar to those described above. Net option premiums received will be included as initial margin deposits.

Investments in futures options involve some of the same considerations that are involved in connection with investments in futures contracts (for example, the existence of a liquid secondary market). In addition, the purchase or sale of an option also entails the risk that changes in the value of the underlying futures contract will not correspond to changes in the value of the option purchased. Depending on the pricing of the option compared to either the futures contract upon which it is based, or upon the price of the securities being hedged, an option may or may not be less risky than ownership of the futures contract or such securities. In general, the market prices of options can be expected to be more volatile than the market prices on the underlying futures contract. Compared to the purchase or sale of futures contracts, however, the purchase of call or put options on futures contracts may frequently involve less potential risk to a Fund because the maximum amount at risk is the premium paid for the options (plus transaction costs). The writing of an option on a futures contract involves risks similar to those risks relating to the purchase or sale of futures contracts.

An option on a futures contract, as contrasted with the direct investment in such a contract, gives the purchaser the right, but not the obligation, in return for the premium paid, to assume a position in the underlying futures contract at a specified exercise price at any time prior to the expiration date of the option. The writer of the option becomes contractually obligated to take the opposite futures position specified in the option.

Upon exercise of an option on a futures contract, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance in the writer's futures margin account that represents the amount by which the market price of the futures contract exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. The potential for loss related to the purchase of an option on a futures contract is limited to the premium paid for the option plus transaction costs. Because the value of the option is fixed at the point of sale, there are no daily cash payments by the purchaser to reflect changes in the value of the underlying contract; however, the value of the option changes daily and that change would be reflected in the net asset value per share ("NAV") of a Fund.

A Fund may purchase and write put and call options on futures contracts that are traded on an exchange as a hedge against changes in value of its portfolio securities, or in anticipation of the purchase of securities, and may enter into closing transactions with respect to such options to terminate existing positions. There is no guarantee that such closing transactions can be effected.

A Fund's use of options on futures contracts is subject to the risks related to derivative instruments generally. In addition, the amount of risk a Fund assumes when it purchases an option on a futures contract is the premium paid for the option plus related transaction costs. The purchase of an option also entails the risk that changes in the value of the underlying futures contract will not be fully reflected in the value of the option purchased. The writer of an option on a futures contract is

subject to the risk of having to take a possibly adverse futures position if the purchaser of the option exercises its rights. If the writer were required to take such a position, it could bear substantial losses. The potential for loss related to writing call options is unlimited. The potential for loss related to writing put options is limited to the agreed upon price per share, also known as the “strike price,” less the premium received from writing the put.

U.S. Federal Tax Treatment of Futures Contracts

A Fund may be required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts or options contracts as of the end of the year as well as those actually realized during the year. Gain or loss from futures contracts or options contracts on broad-based indexes required to be marked-to-market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. A Fund may be required to defer the recognition of losses on futures contracts or options contracts to the extent of any unrecognized gains on related positions held by a Fund.

In order for a Fund to continue to qualify for U.S. federal income tax treatment as a “regulated investment company” under Section 851 of the Code, at least 90% of a Fund’s gross income for a taxable year must be derived from qualifying sources, including, dividends, interest, income derived from loans of securities, gains from the sale of securities or of foreign currencies or other income derived with respect to a Fund’s business of investing in securities. It is anticipated that any net gain realized from the closing out of futures contracts or options contracts will be considered gain from the sale of securities and, therefore, will be qualifying income for purposes of the 90% requirement.

A Fund intends to distribute to shareholders annually any net capital gains that have been recognized for U.S. federal income tax purposes (including unrealized gains at the end of the Fund’s fiscal year) on futures transactions and certain options contracts. Such distributions are combined with distributions of capital gains realized on a Fund’s other investments, and shareholders are advised on the nature of the distributions.

Price Participation Risk

Each Fund employs an investment strategy that includes the sale of call option contracts, which limits the degree to which the Fund will participate in increases in value experienced by the underlying issuer over the Call Period. This means that if the underlying issuer experiences an increase in value above the strike price of the sold call options during a Call Period, the Fund will likely not experience that increase to the same extent and may significantly underperform the underlying issuer over the Call Period. Additionally, because the Fund is limited in the degree to which it will participate in increases in value experienced by the underlying issuer over each Call Period, but has full exposure to any decreases in value experienced by the underlying issuer over the Call Period, the NAV of the Fund may decrease over any given time period. The Fund’s NAV is dependent on the value of each options portfolio, which is based principally upon the performance of the underlying issuer. The degree of participation in the underlying issuer gains the Fund will experience will depend on prevailing market conditions, especially market volatility,

at the time the Fund enters into the sold call option contracts and will vary from Call Period to Call Period. The value of the options contracts is affected by changes in the value and dividend rates of the underlying issuer, changes in interest rates, changes in the actual or perceived volatility of the underlying issuer and the remaining time to the options' expiration, as well as trading conditions in the options market. As the price of the underlying issuer changes and time moves towards the expiration of each Call Period, the value of the options contracts, and therefore the Fund's NAV, will change. However, it is not expected for the Fund's NAV to directly correlate on a day-to-day basis with the returns of the underlying issuer. The amount of time remaining until the options contract's expiration date affects the impact of the potential options contract income on the Fund's NAV, which may not be in full effect until the expiration date of the Fund's options contracts. Therefore, while changes in the price of the underlying issuer will result in changes to the Fund's NAV, the Fund generally anticipates that the rate of change in the Fund's NAV will be different than that experienced by the underlying issuer.

Geographic Concentration Risk

A Fund may be particularly susceptible to economic, political, regulatory or other events or conditions affecting countries within the specific geographic regions in which the Fund invests. Currency devaluations could occur in countries that have not yet experienced currency devaluation to date or could continue to occur in countries that have already experienced such devaluations. As a result, a Fund's net asset value may be more volatile than a more geographically diversified fund.

Government Intervention in Financial Markets Risk

Instability in the financial markets may lead the U.S. government and foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that may experience extreme volatility, and in some cases a lack of liquidity. U.S. federal and state governments and foreign governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities in which the Funds invest, or the issuers of such securities, in ways that are unforeseeable. Issuers of corporate securities might seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which each Fund itself is regulated. Such legislation or regulation could limit or preclude a Fund's ability to achieve its investment objective.

Income Risk

The market value of fixed income investments changes in response to interest rate changes and other factors. A Fund's income could decline due to falling market interest rates. This is because, in a falling interest rate environment, a fund generally will have to invest the proceeds from sales of fund shares, as well as the proceeds from maturing portfolio securities in lower-yielding securities. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. During periods of falling interest rates, certain debt obligations with high interest rates may be prepaid (or "called") by the issuer prior to maturity.

Interest Rate Risk

The values of fixed rate debt securities usually rise and fall in response to changes in interest rates. Declining interest rates generally increase the value of existing debt instruments, and rising interest rates generally decrease the value of existing debt instruments. Changes in a debt instrument's value usually will not affect the amount of interest income paid to a Fund, but will affect the value of the Fund's Shares. Interest rate risk is generally greater for investments with longer maturities. Certain securities pay interest at variable or floating rates. Variable rate securities reset at specified intervals, while floating rate securities reset whenever there is a change in a specified index rate. In most cases, these reset provisions reduce the effect of changes in market interest rates on the value of the security. However, some securities do not track the underlying index directly, but reset based on formulas that can produce an effect similar to leveraging; others may also provide for interest payments that vary inversely with market rates. The market prices of these securities may fluctuate significantly when interest rates change.

Some investments give the issuer the option to call or redeem an investment before its maturity date. If an issuer calls or redeems an investment during a time of declining interest rates, a Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore it might not benefit from any increase in value as a result of declining interest rates.

Investment Companies

A Fund may invest in the securities of other investment companies, subject to applicable limitations under Section 12(d)(1) of the 1940 Act. Pursuant to Section 12(d)(1), a Fund may invest in the securities of another investment company (the "acquired company") provided that a Fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of a Fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of a Fund) having an aggregate value in excess of 10% of the value of the total assets of a Fund. To the extent allowed by law or regulation, a Fund may invest its assets in securities of investment companies in excess of the limits discussed above.

If a Fund invests in and, thus, is a shareholder of, another investment company, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund's own investment adviser and the other expenses that the Fund bears directly in connection with the Fund's own operations.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies, including a Fund. The acquisition of a Fund's Shares by registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by exemptive rules under the 1940 Act or as may at some future time be permitted by an exemptive order that permits registered investment companies to invest in a Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions,

including that the registered investment company enter into an agreement with the Fund regarding the terms of the investment.

The acquisition of shares of a Fund by registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by exemptive rules under the 1940 Act or as permitted by an exemptive order obtained by the Trust that permits registered investment companies to invest in the Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the registered investment company enter into an agreement with the Fund regarding the terms of the investment. Rule 12d1-4 permits other investment companies to invest in the Fund beyond the limits in Section 12(d)(1), subject to similar conditions.

Exchange-Traded Funds Risk A Fund may invest in certain exchange-traded funds (“Underlying ETFs”). Through its positions in Underlying ETFs, a Fund generally will be subject to the risks associated with such Underlying ETF’s investments, including the possibility that the value of the securities or instruments held by or linked to an Underlying ETF could decrease. Certain of the Underlying ETFs may hold common portfolio positions, thereby reducing any diversification benefits. The ETPs in which a Fund invests are pooled investment vehicles that are not registered pursuant to the 1940 Act and, therefore, are not subject to the regulatory scheme of the 1940 Act including the investor protections afforded by the 1940 Act. Under normal market conditions, a Fund will purchase shares of or interest in Underlying ETFs in the secondary market. When a Fund invests in an Underlying ETF, in addition to directly bearing the expenses associated with its own operations, it also will bear a pro rata portion of the Underlying ETF’s expenses (including operating costs and management fees).

Liquidity Risk

In certain circumstances, it may be difficult for a Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for a Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Adviser to dispose of such securities at a fair price at the time the Adviser believes it is desirable to do so. In addition, the Funds’ investments in ETNs and certain other ETPs may be subject to restrictions on the amount and timing of any redemptions. The Funds’ investments in such securities may restrict the Funds’ ability to take advantage of other market opportunities and adversely affect the value of the Funds’ portfolio holdings. The Funds’ investments in certain ETPs also may be subject to trading halts caused by extraordinary market volatility pursuant to “circuit breaker” rules.

Management Risk

As a Fund may implement its investment objective, it is subject to the risk that the Adviser’s investment strategy may not produce the intended results.

Market Risk

An investment in a Fund involves risks similar to those of investing in any fund of equity securities, such as market fluctuations caused by such factors as economic and political developments,

changes in interest rates and perceived trends in securities prices. The value of the equity security that the Fund invests in and seeks to track could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting the securities markets generally or a specific issuer or market. A Fund is subject to the risk that the Adviser's investment strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. Market risk refers to the possibility that the market values of securities or other investments that a Fund holds will fall, sometimes rapidly or unpredictably, or fail to rise. Security values may fall or fail to rise because of a variety of actual or perceived factors affecting an issuer (e.g., an unfavorable earnings report), the industry or sector in which it operates, or the market as a whole, which may reduce the value of an investment in a Fund. Accordingly, an investment in a Fund could lose money over short or long periods. The market values of the securities a Fund holds can be affected by changes or perceived changes in U.S. or foreign economies and financial markets, and the liquidity of these securities, among other factors. Although equity securities generally tend to have greater price volatility than debt securities, under certain market conditions, debt securities may have comparable or greater price volatility. In addition, stock prices may be sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase.

Market Trading Risk

Each Fund faces numerous market trading risks, including disruptions to the creation and redemption processes of a Fund, losses from trading in secondary markets, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. The NAV of Shares will fluctuate with changes in the market value of a Fund's securities holdings. The market prices of Shares will fluctuate in accordance with changes in NAV and supply and demand on the Exchange. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Index trading individually or in the aggregate at any point in time. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. Any of these factors, discussed above and further below, may lead to Shares trading at a premium or discount to a Fund's NAV.

Absence of Prior Active Market

While a Fund's Shares are listed on an Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. The Distributor does not maintain a secondary market in Shares.

Trading Issues

Trading in Shares on an Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on an

Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of an Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged.

Money Market Funds

A Fund may use a variety of money market instruments for cash management purposes, including money market funds, depositary accounts and repurchase agreements. Repurchase agreements are contracts in which a seller of securities agrees to buy the securities back at a specified time and price. Repurchase agreements may be subject to market and credit risk related to the collateral securing the repurchase agreement. Money market instruments, including money market funds, may lose money through fees or other means.

National Closed Market Trading Risk

To the extent that the underlying securities held by a Fund trade on foreign exchanges that may be closed when the securities exchange on which a Fund's Shares trade is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security (i.e., a Fund's quote from the closed foreign market). These deviations could result in premiums or discounts to a Fund's NAV that may be greater than those experienced by other ETFs.

NAV Erosion Risk Due to Distributions

When a Fund makes a distribution, the Fund's NAV will typically drop by the amount of the distribution on the related ex-dividend date. The repeated payment of distributions by the Fund, if any, may significantly erode the Fund's NAV and trading price over time. As a result, an investor may suffer significant losses to their investment in Fund shares.

New Adviser Risk

The Adviser has only recently commenced managing ETFs. As a result, investors do not have a long-term track record of managing a mutual fund from which to judge the Adviser and the Adviser may not achieve the intended result in managing the Fund.

New Fund Risk

The Funds are new funds, with limited operating history, which may result in additional risks for investors in the Funds. There can be no assurance that these Funds will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Funds. While shareholder interests will be the paramount consideration, the timing of any liquidation may not be favorable to certain individual shareholders.

Operational Risk

Each Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of a Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. Each Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Repurchase Agreements

A repurchase agreement is an instrument under which the purchaser (i.e., a Fund) acquires the security and the seller agrees, at the time of the sale, to repurchase the security at a mutually agreed upon time and price, thereby determining the yield during the purchaser's holding period. Repurchase agreements may be construed to be collateralized loans by the purchaser to the seller secured by the securities transferred to the purchaser. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by a Fund but only to constitute collateral for the seller's obligation to pay the repurchase price, and, in the event of a default by the seller, a Fund may suffer time delays and incur costs or losses in connection with the disposition of the collateral.

In any repurchase transaction, the collateral for a repurchase agreement may include: (i) cash items; (ii) obligations issued by the U.S. government or its agencies or instrumentalities; or (iii) obligations that, at the time the repurchase agreement is entered into, are rated in the highest rating category generally by at least two nationally recognized statistical rating organizations ("NRSROs"), or, if unrated, determined to be of comparable quality by the Adviser. Collateral, however, is not limited to the foregoing and may include, for example, obligations rated below the highest category by NRSROs. Collateral for a repurchase agreement may also include securities that a Fund could not hold directly without the repurchase obligation.

Irrespective of the type of collateral underlying the repurchase agreement, in the case of a repurchase agreement entered into by a non-money market fund, the repurchase obligation of a seller must be of comparable credit quality to securities that are rated in the highest two short-term credit rating categories by at least one NRSRO or, if unrated, deemed by the Adviser to be of equivalent quality.

Repurchase agreements pose certain risks for a Fund if it utilizes them. Such risks are not unique to a Fund, but are inherent in repurchase agreements. Each Fund seeks to minimize such risks, but because of the inherent legal uncertainties involved in repurchase agreements, such risks cannot be eliminated. Lower quality collateral and collateral with longer maturities may be subject to greater price fluctuations than higher quality collateral and collateral with shorter maturities. If the repurchase agreement counterparty were to default, lower quality collateral may be more difficult to liquidate than higher quality collateral. Should the counterparty default and the amount of collateral not be sufficient to cover the counterparty's repurchase obligation, a Fund would retain the status of an unsecured creditor of the counterparty (i.e., the position a Fund would normally be in if it were to hold, pursuant to its investment policies, other unsecured debt securities of the

defaulting counterparty) with respect to the amount of the shortfall. As an unsecured creditor, a Fund would be at risk of losing some or all of the principal and income involved in the transaction.

Short-Term Instruments

Each Fund may invest in short-term instruments, including money market instruments, on an ongoing basis to provide liquidity for cash equitization, funding, or under abnormal market conditions. Money market instruments are generally short-term investments that may include but are not limited to: (i) shares of money market funds;

(ii) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities (including government-sponsored enterprises); (iii) negotiable certificates of deposit (“CDs”), bankers’ acceptances, fixed time deposits and other obligations of U.S. and foreign banks (including foreign branches) and similar institutions; (iv) commercial paper rated at the date of purchase “Prime-1” by Moody’s or “A-1” by Standard & Poor’s Financial Services LLC, or if unrated, of comparable quality as determined by the Adviser; (v) non-convertible corporate debt securities (e.g., bonds and debentures) with remaining maturities at the date of purchase of not more than 397 days and that satisfy the rating requirements set forth in Rule 2a-7 under the 1940 Act; and (vi) short-term U.S. dollar-denominated obligations of foreign banks (including U.S. branches) that, in the opinion of the Adviser, are of comparable quality to obligations of U.S. banks which may be purchased by a Fund. Any of these instruments may be purchased on a current or a forward-settled basis. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers’ acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Swaps

Over-the-counter (“OTC”) swap agreements are contracts between parties in which one party agrees to make payments to the other party based on the change in market value or level of a specified index or asset. In return, the other party agrees to make payments to the first party based on the return of a different specified index or asset. Although OTC swap agreements entail the risk that a party will default on its payment obligations thereunder, a Fund seeks to reduce this risk by entering into agreements that involve payments no less frequently than quarterly. The net amount of the excess, if any, of a Fund’s obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust’s custodian bank.

The use of such swap agreements involves certain risks. For example, if the counterparty, under a swap agreement, defaults on its obligation to make payments due from it as a result of its bankruptcy or otherwise, a Fund may lose such payments altogether or collect only a portion thereof, which collection could involve costs or delays.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) and related regulatory developments require the eventual clearing and exchange-trading of many standardized OTC derivative instruments that the CFTC and Securities and Exchange Commission

(“SEC”) recently defined as “swaps” and “security-based swaps,” respectively. Mandatory exchange-trading and clearing is occurring on a phased-in basis based on the type of market participant and CFTC approval of contracts for central clearing and exchange trading. In a cleared swap, a Fund’s ultimate counterparty is a central clearinghouse rather than a brokerage firm, bank or other financial institution. A Fund initially will enter into cleared swaps through an executing broker. Such transactions will then be submitted for clearing and, if cleared, will be held at regulated futures commission merchants (“FCMs”) that are members of the clearinghouse that serves as the central counterparty. When a Fund enters into a cleared swap, it must deliver to the central counterparty (via an FCM) an amount referred to as “initial margin.” Initial margin requirements are determined by the central counterparty, but an FCM may require additional initial margin above the amount required by the central counterparty. During the term of the swap agreement, a “variation margin” amount may also be required to be paid by a Fund or may be received by a Fund in accordance with margin controls set for such accounts, depending upon changes in the price of the underlying reference asset subject to the swap agreement. At the conclusion of the term of the swap agreement, if a Fund has a loss equal to or greater than the margin amount, the margin amount is paid to the FCM along with any loss in excess of the margin amount. If a Fund has a loss of less than the margin amount, the excess margin is returned to a Fund. If a Fund has a gain, the full margin amount and the amount of the gain is paid to a Fund.

Central clearing is designed to reduce counterparty credit risk compared to uncleared swaps because central clearing interposes the central clearinghouse as the counterparty to each participant’s swap, but it does not eliminate those risks completely. There is also a risk of loss by a Fund of the initial and variation margin deposits in the event of bankruptcy of the FCM with which a Fund has an open position in a swap contract. The assets of a Fund may not be fully protected in the event of the bankruptcy of the FCM or central counterparty because a Fund might be limited to recovering only a pro rata share of all available funds and margin segregated on behalf of an FCM’s customers. If the FCM does not provide accurate reporting, a Fund is also subject to the risk that the FCM could use a Fund’s assets, which are held in an omnibus account with assets belonging to the FCM’s other customers, to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty. Exchange-trading is expected to increase liquidity of swaps trading.

In addition, with respect to cleared swaps, a Fund may not be able to obtain as favorable terms as it would be able to negotiate for an uncleared swap. In addition, an FCM may unilaterally impose position limits or additional margin requirements for certain types of swaps in which a Fund may invest. Central counterparties and FCMs generally can require termination of existing cleared swap transactions at any time, and can also require increases in margin above the margin that is required at the initiation of the swap agreement. Margin requirements for cleared swaps vary on a number of factors, and the margin required under the rules of the clearinghouse and FCM may be in excess of the collateral required to be posted by a Fund to support its obligations under a similar uncleared swap. However, regulators are expected to adopt rules imposing certain margin requirements, including minimums, on uncleared swaps in the near future, which could change this comparison.

A Fund is also subject to the risk that, after entering into a cleared swap with an executing broker, no FCM or central counterparty is willing or able to clear the transaction. In such an event, the

central counterparty would void the trade. Before a Fund can enter into a new trade, market conditions may become less favorable to a Fund.

The Adviser will continue to monitor developments regarding trading and execution of cleared swaps on exchanges, particularly to the extent regulatory changes affect a Fund's ability to enter into swap agreements and the costs and risks associated with such investments.

Tax Risks

Each Fund invests in derivatives. The federal income tax treatment of a derivative may not be as favorable as a direct investment in an underlying asset. Derivatives may produce taxable income and taxable realized gain. Derivatives may adversely affect the timing, character and amount of income the Fund realizes from its investments. As a result, a larger portion of the Fund's distributions may be treated as ordinary income rather than as capital gains. In addition, certain derivatives are subject to mark-to-market or straddle provisions of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). If such provisions are applicable, there could be an increase (or decrease) in the amount of taxable dividends paid by a Fund.

Each Fund intends to elect and to qualify each year to be treated as a RIC under Subchapter M of the Code. As a RIC, a Fund will not be subject to U.S. federal income tax on the portion of its net investment income and net capital gain that it distributes to Shareholders, provided that it satisfies certain requirements of the Code. If a Fund does not qualify as a RIC for any taxable year and certain relief provisions are not available, the Fund's taxable income will be subject to tax at the Fund level and to a further tax at the shareholder level when such income is distributed. To comply with the asset diversification test applicable to a RIC, each Fund will attempt to ensure that the value of options it holds is never 25% of the total value of Fund assets at the close of any quarter. If a Fund's investments in options were to exceed 25% of the Fund's total assets at the end of a tax quarter, the Fund, generally, has a grace period to cure such lack of compliance. If a Fund fails to timely cure, it may no longer be eligible to be treated as a RIC.

U.S. Government Securities

Each Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association ("Fannie Mae"), the Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal

Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and the Federal Home Loan Mortgage Corporation (“Freddie Mac”), placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth over the next three years. As a result of this Agreement, the investments of holders, including a Fund, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

The total public debt of the United States as a percentage of gross domestic product has grown rapidly since the beginning of the 2008-2009 financial downturn. Although high debt levels do not necessarily indicate or cause economic problems, they may create certain systemic risks if sound debt management practices are not implemented. A high national debt can raise concerns that the U.S. government will not be able to make principal or interest payments when they are due. This increase has also necessitated the need for the U.S. Congress to negotiate adjustments to the statutory debt limit to increase the cap on the amount the U.S. government is permitted to borrow to meet its existing obligations and finance current budget deficits. In August 2011, S&P lowered its long-term sovereign credit rating on the U.S. In explaining the downgrade at that time, S&P cited, among other reasons, controversy over raising the statutory debt limit and growth in public spending. On September 8, 2017, following passage by Congress, the President of the United States signed the Continuing Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017, which suspends the statutory debt limit through December 8, 2017. On January 22, 2018, Congress passed a short-term funding measure to allow legislators until February 8, 2018 to negotiate a longer-term solution. Any controversy or ongoing uncertainty regarding the statutory debt limit negotiations may impact the U.S. long-term

sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. government may be adversely affected.

Valuation Risk

The sale price a Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities or assets that trade low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities or assets in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's Shares.

Warrants and Subscription Rights

Warrants are equity securities in the form of options issued by a corporation which give the holder the right to purchase stock, usually at a price that is higher than the market price at the time the warrant is issued. A purchaser takes the risk that the warrant may expire worthless because the market price of the common stock fails to rise above the price set by the warrant.

When-Issued Securities, Delayed-Delivery and Forward Commitment Securities

A when-issued, delayed-delivery or forward commitment security is one whose terms are available and for which a market exists, but which have not been issued. If a Fund engages in when-issued, delayed-delivery or forward commitment transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the Fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued, delayed-delivery or forward commitment basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the market value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because a Fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

Decisions to enter into when-issued, delayed-delivery or forward commitment transactions will be considered on a case-by-case basis when necessary to maintain continuity in a company's index membership.

Wholly Owned Subsidiary

Each Fund may invest up to 25% of its total assets in a wholly owned and controlled foreign subsidiary of the Fund, organized under the laws of the Cayman Islands, (the "Subsidiary"), consistent with the limits of the U.S. federal tax law requirements applicable to registered investment companies. Each Subsidiary is advised by the Adviser. Unlike a Fund, its Subsidiary may invest without limitation in Gold, Silver or Platinum ETPs, as applicable, and other gold, silver or platinum-related instruments, as applicable; however, each Subsidiary will comply with the same derivatives rule requirements under the 1940 Act, when viewed on a consolidated basis with the respective Fund, with respect to its investments in derivatives and leverage; and also

complies with the provisions of Section 15 of the 1940 Act (regarding investment advisory contract approvals).

Each Subsidiary will not be registered under the 1940 Act but will be subject to certain of the investor protections of the 1940 Act, as noted in this SAI. The Adviser will on behalf of each Subsidiary, file a notice with the CFTC and the NFA claiming exemption from the CFTC's reporting requirements in accordance with Part 4 of the CFTC regulations pursuant to no-action relief for certain subsidiaries of registered investment companies. Under this no-action letter guidance, the CFTC provides relief relating to CFTC reporting requirements for commodity pools, such as the Subsidiary, which are wholly owned subsidiaries of registered investment companies (such as the Fund). The Adviser also claims exemption from the CFTC's disclosure and reporting requirements in accordance with Part 4 of the CFTC regulations, which provide relief relating to CFTC disclosure and reporting requirements for commodity pools, such as the Subsidiaries, that are operated by a commodity pool operator that is the same as, controls, is controlled by or is under common control with the commodity pool operator of an offered pool (such as the Funds).

Changes in the laws of the United States and/or the Cayman Islands, under which the Funds and the Subsidiaries, respectively, are organized, could result in the inability of a Fund and/or a Subsidiary to operate as described in this SAI and could negatively affect the Fund and its shareholders. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiaries. If Cayman Islands law changes such that the Subsidiaries must pay Cayman Islands taxes, a Fund's shareholders would likely suffer decreased investment returns.

INVESTMENT RESTRICTIONS AND POLICIES

The Trust has adopted the following investment restrictions as fundamental policies with respect to a Fund. These restrictions cannot be changed without the approval of the holders of a majority of a Fund's outstanding voting securities. For purposes of the 1940 Act, a majority of the outstanding voting securities of a Fund means the vote, at an annual or a special meeting of the security holders of the Trust, of the lesser of (1) 67% or more of the voting securities of the Fund present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund. Under these restrictions:

1. Each Fund may not make loans, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
2. Each Fund may not borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
3. Each Fund may not issue senior securities, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
4. Each Fund may not purchase or sell real estate, except that the Fund may: (i) invest in securities of issuers that invest in real estate or interests therein; (ii) invest in mortgage-related securities and other securities that are secured by real estate or

interests therein; and (iii) hold and sell real estate acquired by the Fund as a result of the ownership of securities;

5. Each Fund may not underwrite securities issued by other persons, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;
6. Each Fund may not purchase or sell commodities, unless acquired as a result of owning securities or other instruments, but it may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments, may invest in securities or other instruments backed by commodities, and may purchase or sell precious metals directly; and
7. [Gold Fund Only] The Gold Fund may not purchase any security if, as a result of that purchase, more than 25% of the Fund's total assets would be invested in securities of issuers having their principal business activities in the same industry or group of industries except that the Fund will invest more than 25% of its total assets in investments that provide exposure to gold.
8. [Silver Fund Only] The Silver Fund may not purchase any security if, as a result of that purchase, more than 25% of the Silver Fund's total assets would be invested in securities of issuers having their principal business activities in the same industry or group of industries except that the Silver Fund will invest more than 25% of its total assets in investments that provide exposure to silver.
9. [Platinum Fund Only] The Platinum Fund may not purchase any security if, as a result of that purchase, more than 25% of the Platinum Fund's total assets would be invested in securities of issuers having their principal business activities in the same industry or group of industries except that the Platinum Fund will invest more than 25% of its total assets in investments that provide exposure to platinum.

With respect to investment limitations 7, 8 and 9 above, these limits do not apply to securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. For purposes of determining industry concentration, if the Fund invests in underlying investment companies, the Fund will consider the concentration of the underlying investment companies for purposes of determining compliance with its own concentration policy..

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money will be continuously complied with.

Non-Fundamental Policies

The Funds are also subject to the following non-fundamental restrictions and policies (which may be changed by the Trust's Board of Trustees without shareholder approval) relating to the investment of its assets and activities:

1. Each Fund may not invest more than 15% of its net assets in illiquid investments that are assets, as determined pursuant to Rule 22e-4 under the 1940 Act and the Fund's procedures adopted thereunder.
2. [Gold Fund only] Under normal circumstances, the Gold Fund invests at least 80% of its net assets plus any borrowings for investment purposes in securities of gold or gold bullion-related ETPs or derivatives on gold or gold bullion-related ETPs, the value of which are linked to gold bullion.
3. [Silver Fund only] Under normal circumstances, the Silver Fund invests at least 80% of its net assets plus any borrowings for investment purposes in securities of silver or physical silver-related ETPs or derivatives on silver or physical silver-related ETPs, the value of which are linked to physical silver.
4. [Platinum Fund only] Under normal circumstances, the Platinum Fund invests at least 80% of its net assets plus any borrowings for investment purposes in securities of platinum or Physical platinum-related ETPs or derivatives on platinum or Physical platinum-related ETPs, the value of which are linked to Physical platinum.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money will be continuously complied with.

The policy may be changed by the Board of Trustees of the Trust without shareholder approval upon 60 days' written notice to shareholders.

BOARD OF TRUSTEES OF THE TRUST

The Board of the Trust consists of four Trustees, three of whom are not "interested persons" (as defined in the 1940 Act), of the Trust ("Independent Trustees"). The Board is responsible for overseeing the management and operations of the Trust, including the general oversight of the duties and responsibilities performed by the Adviser and other service providers to the Trust. The Adviser is responsible for the day-to-day administration, operation and business affairs of the Trust.

The Board believes that each Trustee's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that the Board possesses the requisite skills and attributes to carry out its oversight responsibilities with respect to the Trust. The Board believes that the Trustees' ability to review, critically evaluate, question and discuss information provided to them, to interact effectively with the Adviser, the

Trust's other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support this conclusion. In reaching its conclusion, the Board also has considered the (i) experience, qualifications, attributes and/or skills, among others, of its members, (ii) each member's character and integrity, (iii) the length of service as a board member of the Trust, (iv) each person's willingness to serve and ability to commit the time necessary to perform the duties of a Trustee, and (v) as to each Independent Trustee, such Trustee's status as not being an "interested person" (as defined in the 1940 Act) of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee.

References to the experience, qualifications, attributes, and skills of Trustees are pursuant to requirements of the SEC, do not constitute the holding out of the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

The Trustees of the Trust, their addresses, positions with the Trust, ages, term of office and length of time served, principal occupations during the past five years, the number of portfolios in the Fund Complex overseen by each Trustee and other directorships, if any, held by the Trustees, are set forth below.

The Board is also responsible for overseeing the nature, extent, and quality of the services provided to each Fund by the Adviser and receives information about those services at its regular meetings. In addition, on an annual basis (following the initial two-year period), in connection with its consideration of whether to renew the Management Agreement with the Adviser, the Board or its designee may meet with the Adviser, as appropriate, to review such services. Among other things, the Board regularly considers the Adviser's adherence to the Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund's performance and the Fund's investments, including, for example, portfolio holdings schedules.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund or Adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. Annually, the Funds' independent registered public accounting firm reviews with the Audit Committee its audit of each Fund's financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be

disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the Fund, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Board as to risk management matters are typically summaries of the relevant information. Most of the Fund's investment management and business affairs are carried out by or through the Adviser and other service providers, each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Fund's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Independent Trustees

The address of each trustee is c/o 1 Letterman Drive, Building C, Suite 3-500 San Francisco, CA 94129. Each trustee serves for the life of the Trust, subject to their earlier death, incapacitation, resignation, retirement or removal as more specifically provided in the Trust's organizational documents.

| Name, Year of Birth, and Position(s) held with the Trust | Length of Time Served | Principal Occupation(s) During Past Five Years | Number of Portfolios in the Fund Complex Overseen | Other Directorships Held by Trustee During Past Five Years |
|---|------------------------------|--|--|---|
| John Hyland 1959 | Indefinite/Since March 2021 | Director, Matthews International Capital Management LLC (an investment advisory firm) (2018 – 2023); Global Head of Listed Securities, Bitwise Asset Management, Inc. (an investment | 12 | PointBreak ETF Trust (Dec. 2015 – Dec. 2017) |

| | | | | |
|-------------------------|----------------------------------|--|----|------|
| | | advisory firm) (2018 – 2019); CEO/Chairman, PointBreak ETF Trust (an investment management company) (2015 – 2017). | | |
| Ed McRedmond 1960 | Indefinite/Since October 2019 | Founder, etfEd Advisory (an ETF consulting company) (2016 – present); Senior VP, Invesco Powershares Capital Management (an investment advisory firm) (2005 – 2016). | 12 | None |
| Markus Aakko 1974 | Indefinite/Since March 2024 | President, Roarke Financial Strategies LLC (2022 – present); Executive Vice President, PIMCO (2010 – 2022). | 12 | None |

Interested Trustees

The address of each trustee is c/o 1 Letterman Drive, Building C, Suite 3-500 San Francisco, CA 94129. Each trustee serves for the life of the Trust, subject to their earlier death, incapacitation, resignation, retirement or removal as more specifically provided in the Trust’s organizational documents.

| Name, Year of Birth, and Position(s) held with the Trust | Length of Time Served | Principal Occupation(s) During Past Five Years | Number of Portfolios in the Fund Complex Overseen | Other Directorships Held By Trustee During Past Five Years |
|---|-----------------------------------|---|--|---|
| Howard Chan 1982 | Indefinite/Since February 2024 | Managing Director, Wellfy LLC. | 12 | None |

*Indicates an “interested person” of the Trust, as that term is defined in Section 2(a)(19) of the 1940 Act.

Officer Information

The Officers of the Trust, their addresses, positions with the Trust, ages and principal occupations during the past five years are set forth below.

The address for each officer is c/o 1 Letterman Drive, Building C, Suite 3-500 San Francisco, CA 94129 unless otherwise indicated. Each officer serves an indefinite term or until their successors are elected and qualified.

| Officer's Name, and Year of Birth | Position(s) Held with the Trust | Length of Time Served | Principal Occupation(s) During The Past Five Years |
|--|---|--------------------------------|---|
| Howard Chan 1982 | Chief Executive Officer and President | Indefinite/Since February 2024 | CEO, Kurv Investment Management LLC (2022 - present) Managing Director, Wellfy LLC (financial consulting) (2015 – present) |
| Madeline Arment* 1989 | Principal Financial Officer and Treasurer | Indefinite/Since March 2024 | Director, PINE Advisor Solutions (2022 – present); Fund Controller, ALPS Fund Services, Inc. (2018 – 2022) |
| Randi Roessler* 1981 | Chief Compliance Officer | Indefinite/Since March 2024 | Director, PINE Advisor Solutions (March 2023 – present); Chief Compliance Officer, Davis Selected Advisers, L.P., Davis Funds, Selected Funds, the Clipper Fund Trust, the Davis Fundamental ETF Trust, and Davis Distributors, LLC (2018 – 2023) |
| Masako Walsh 1976 | Secretary | Indefinite/Since June 2024 | Kurv Investment Management, LLC (Jul. 2022 – present); Vice President, PIMCO (Mar. 2010 – Feb. 2022) |

* Address is 501 S. Cherry Street, Suite 610, Denver, Colorado 80246.

Board Committees

The Board has an Audit Committee consisting solely of the three Trustees who are Independent Trustees. John Hyland has been designated as an “audit committee financial expert” as defined under Item 407 of Regulation S-K of the Securities Exchange Act of 1934, as amended (“Exchange Act”). John Hyland, an Independent Trustee, is the Chairman of the Audit Committee. The Audit

Committee has the responsibility, among other things, to: (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting; (ii) oversee the quality and integrity of the Trust's financial statements and the independent audit thereof; (iii) oversee or, as appropriate, assist the Board's oversight of the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, internal control over financial reporting and independent audit; (iv) approve prior to appointment the engagement of the Trust's independent registered public accounting firm and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent registered public accounting firm; and (v) act as a liaison between the Trust's independent registered public accounting firm and the full Board. The Audit Committee three times in 2024.

The Board has determined that its leadership structure is appropriate given the business and nature of the Trust. The Chairman of the Board can play an important role in setting the agenda of the Board and also serves as a key point person for dealings between management and the Independent Trustees. The Board considered that the Chairman of the Audit Committee is an Independent Trustee, which yields similar benefits with respect to the functions and activities of the various Board committees. The Independent Trustees also regularly meet outside the presence of management. The Board has determined that its committees help ensure that the Trust has effective and independent governance and oversight. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from management of the Trust, including the Adviser. The Board reviews its structure on an annual basis.

As an integral part of its responsibility for oversight of the Trust in the interests of shareholders, the Board, as a general matter, oversees risk management of the Trust's investment programs and business affairs. The function of the Board with respect to risk management is one of oversight and not active involvement in, or coordination of, day-to-day risk management activities for the Trust. The Board recognizes that (i) not all risks that may affect the Trust can be identified, (ii) it may not be practical or cost-effective to eliminate or mitigate certain risks, (iii) it may be necessary to bear certain risks (such as investment-related risks) to achieve the Trust's goals, and (iv) the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees that may relate to risk management matters are typically summaries of the relevant information.

The Board exercises oversight of the risk management process primarily through the Audit Committee, and through oversight by the Board itself. The Trust faces a number of risks, such as investment-related and compliance risks. The Adviser's personnel seek to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust. Under the overall supervision of the Board or the applicable Committee of the Board, the Trust and Adviser employ a variety of processes, procedures and controls to identify such possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer, as well as various personnel of the Adviser and other service providers such

as the Trust's independent accountants, may report to the Audit Committee and/or to the Board with respect to various aspects of risk management, as well as events and circumstances that have arisen and responses thereto.

Trustee Ownership of Fund Shares

For each Trustee, the dollar range of equity securities beneficially owned by the Trustee in the Trust and in all registered investment companies advised by the Adviser ("Family of Investment Companies") that are overseen by the Trustee is shown below.

| Name of Trustee | Dollar Range of Equity Securities in (as of March 31, 2025) | | | Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen By Trustee In Family of Investment Companies (as of March 31, 2025) |
|-----------------|---|---------------------------------|-----------------------------------|---|
| | Kurv Gold Enhanced Income ETF | Kurv Silver Enhanced Income ETF | Kurv Platinum Enhanced Income ETF | |
| Howard Chan | \$0 | \$0 | \$0 | >\$100,000 |
| Ed McRedmond | \$0 | \$0 | \$0 | \$0 |
| John Hyland | \$0 | \$0 | \$0 | \$0 |
| Markus Aakko | \$0 | \$0 | \$0 | \$0 |

As to each Independent Trustee and his immediate family members, no person owned beneficially or of record securities in the Adviser or Foreside Fund Services, LLC ("Distributor"), or a person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Adviser or the Distributor.

Shareholder Communications to the Board

Shareholders may send communications to the Board by addressing the communications directly to the Board (or individual Board members) and/or otherwise clearly indicating in the salutation that the communication is for the Board (or individual Board members). The shareholder may send the communication to either the Trust's office or directly to such Board members at the address specified for each Trustee. Other shareholder communications received by the Trust not directly addressed and sent to the Board will be reviewed and generally responded to by management. Such communications will be forwarded to the Board at management's discretion based on the matters contained therein.

Remuneration of Trustees

Each Independent Trustee is paid an annual retainer of \$10,000 for his or her services as a Board member to the Trust, and, in 2024, a one-time fee with respect to attending all special board meetings relating to the consideration of new Trust vendors and a proposed reorganization in the amount of \$3,000, together with out-of-pocket expenses, in accordance with the Board's policy on travel and other business expenses relating to attendance at meetings. The Chairman of the Audit Committee is paid an additional annual retainer of \$2,000.

Annual Trustee fees may be reviewed periodically and changed by the Board.

The following tables show the compensation anticipated to be earned by each Trustee during the initial fiscal year of each Fund. The Trust does not have a bonus, profit sharing, pension or retirement plan.

| Name | Kurv Gold Enhanced Income ETF | Pension or Retirement Benefits Accrued as Part of Funds Expenses | Annual Benefits Upon Retirement | Total Compensation From Funds and Fund Complex** Paid to Trustees |
|--------------|-------------------------------|--|---------------------------------|---|
| Howard Chan | \$0 | N/A | N/A | \$0 |
| Ed McRedmond | \$1,000 | N/A | N/A | \$10,000 |
| John Hyland | \$1,200 | N/A | N/A | \$12,000 |
| Markus Aakko | \$1,000 | N/A | N/A | \$10,000 |

| Name | Kurv Silver Enhanced Income ETF | Pension or Retirement Benefits Accrued as Part of Funds Expenses | Annual Benefits Upon Retirement | Total Compensation From Funds and Fund Complex** Paid to Trustees |
|--------------|---------------------------------|--|---------------------------------|---|
| Howard Chan | \$0 | N/A | N/A | \$0 |
| Ed McRedmond | \$1,000 | N/A | N/A | \$10,000 |
| John Hyland | \$1,200 | N/A | N/A | \$12,000 |
| Markus Aakko | \$1,000 | N/A | N/A | \$10,000 |

| Name | Kurv Platinum Enhanced Income ETF | Pension or Retirement Benefits Accrued as Part of Funds Expenses | Annual Benefits Upon Retirement | Total Compensation From Funds and Fund Complex** Paid to Trustees |

| Howard Chan | \$0 | N/A | N/A | \$0 |
| Ed McRedmond | \$1,000 | N/A | N/A | \$10,000 |
| John Hyland | \$1,200 | N/A | N/A | \$12,000 |
| Markus Aakko | \$1,000 | N/A | N/A | \$10,000 |

Limitation of Trustees' Liability

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrong-doing of any officer, agent, employee, adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that the Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, any person who is serving or has served at the Trust's request as a Trustee, officer, trustee, employee or agent of another organization in which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the Amended and Restated By-laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

MANAGEMENT AND OTHER SERVICE PROVIDERS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Management of The Funds”

Investment Adviser

Kurv Investment Management LLC, located at 1 Letterman Drive, Building C, Suite 3-500, San Francisco, CA 94129, serves as the investment adviser to the Funds. The Adviser is a Delaware limited liability company formed in 2022 to provide investment advisory services to registered investment companies. In addition, Kurv Investment Management LLC developed the investment strategy for each Fund. Kurv Investment Management LLC is a wholly owned subsidiary of Kurv Investment, Inc.

Under an investment advisory agreement between the Trust, on behalf of each Fund, and the Adviser, the Adviser provides investment advisory services to the Funds.

Subject to the general oversight of the Board, the Adviser provides or causes to be furnished all supervisory and other services reasonably necessary for the operation of the Funds, audit, portfolio accounting, legal, transfer agency, custody, printing costs, certain administrative services (provided pursuant to a separate administration agreement), certain distribution services (provided pursuant to a separate distribution agreement), certain shareholder and distribution-related services (provided pursuant to a separate Rule 12b-1 Plan and related agreements) and investment management and investment advisory services (provided pursuant to the Management Agreement) under what is essentially an all-in fee structure. Each Fund bears other expenses which are not covered under the Management Agreement that may vary and will affect the total level of expenses paid by the Fund, such as taxes and governmental fees, brokerage fees, commissions and other transaction expenses, costs of borrowing money, including interest expenses, certain custody expenses and extraordinary expenses (such as litigation and indemnification expenses).

Pursuant to the Advisory Agreement, each Fund pays the Adviser a fee (“Management Fee”) under the Management Agreement in return for providing investment management, investment advisory and supervisory services and for being obligated to pay certain Fund expenses discussed above. The Adviser is paid a monthly Management Fee at an annual rate of 0.99% of the average daily net assets of each Fund.

The Adviser may from time to time waive all or a portion of its Management Fee. Fee waivers and subsidies will increase a Fund’s total return. These voluntary waivers may be terminated at any time without notice.

A discussion regarding the basis for the Board of Trustees’ approval of the Management Agreement for each Fund will be available in each Fund’s Form N-CSR for the fiscal period ending November 30, 2024.

Pursuant to the Management Agreement, each Fund has agreed to indemnify the Adviser for certain liabilities, including certain liabilities arising under the federal securities laws, unless such loss or liability results from willful misfeasance, bad faith or gross negligence in the performance

of its duties or the reckless disregard of its obligations and duties. The Management Agreement is terminable upon 60 days' notice by the Adviser and will terminate automatically in the event of its assignment (as defined in the 1940 Act).

Portfolio Manager

Dominique Tersin is primarily responsible for the day-to-day management of the Fund.

Dominique Tersin. Mr. Tersin has been employed by the Adviser since 2024. Prior to that, Mr. Tersin was a Vice President and portfolio manager at Pacific Investment Management Company (PIMCO), focusing on short and low-duration portfolios, from 2001 to 2016. He also managed enhanced liquidity program firmwide as well as the European ETF trading operations at PIMCO.

Other Accounts Managed by the Portfolio Manager

| Name of Portfolio Manager | Other Accounts Managed (As December 31, 2024) | | | Accounts with respect to which the advisory fee is based on the performance of the account | |
|---------------------------|--|--------------------------------|--------------------------------------|--|--------------------------------------|
| | Category of Account | Number of Accounts in Category | Total Assets in Accounts in Category | Number of Accounts in Category | Total Assets in Accounts in Category |
| Dominique Tersin | Registered Investment Companies | 7 | \$38,681,638 | 0 | 0 |
| | Other Pooled Investment Vehicles | 0 | 0 | 0 | 0 |
| | Other Accounts | 0 | 0 | 0 | 0 |

Portfolio Manager Compensation

Mr. Tersin is an equity holder in the Adviser. Mr. Tersin does not receive a discretionary bonus

Portfolio Manager Share Ownership

As of the date of this SAI, the Portfolio Manager did not beneficially own Shares of any Fund.

Conflicts of Interest

A conflict of interest may arise as a result of the Portfolio Managers being responsible for multiple accounts, including the Funds that may have different investment guidelines and objectives. In addition to the Funds, these accounts may include other mutual funds managed on an advisory basis, separate accounts and collective trust accounts. An investment opportunity may be suitable for a Fund as well as for any of the other managed accounts. However, the investment may not be available in sufficient quantity for all of the accounts to participate fully. In addition, there may be limited opportunity to sell an investment held by a Fund or the other account. The other accounts may have similar investment objectives or strategies as a Fund, may track the same benchmarks as the Fund tracks, and may sell securities that are eligible to be held, sold or purchased by the Funds. The Portfolio Managers may be responsible for accounts that have different advisory fee schedules, such as performance-based fees, which may create an incentive for the Portfolio Managers to favor one account over another in terms of access to investment opportunities or the

allocation of the Portfolio Managers' time and resources. The Portfolio Managers may also manage accounts whose investment objectives and policies differ from those of a Fund, which may cause the Portfolio Managers to effect trading in one account that may have an adverse effect on the value of the holdings within another account, including the Fund.

To address and manage these potential conflicts of interest, the Adviser has adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of their clients is treated on a fair and equitable basis. Such policies and procedures include, but are not limited to, trade allocation and trade aggregation policies and oversight by investment management and the Compliance team.

Custodian

U.S. Bank, N.A. (the "Custodian"), located at 1555 N. Rivercenter Drive, MK-WI-S302, Milwaukee, WI 53212, serves as custodian for the Funds pursuant to a custody agreement between the Trust, on behalf of the Funds, and the Custodian. In that capacity, the Custodian holds each Fund's assets.

Transfer Agent and Administrator

U.S. Bancorp Fund Services, LLC (the "Administrator"), located at 615 East Michigan Street, Milwaukee, WI 53202, serves as the Funds' transfer agent pursuant to a transfer agent servicing agreement. In addition, the Administrator provides various accounting services to the Funds pursuant to the Funds' accounting servicing agreement. The Trust and the Administrator have entered into an administration servicing agreement ("Administration Agreement"). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including providing certain operational, clerical, recordkeeping and/or bookkeeping services. The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from the Administrator's refusal or failure to comply with the terms of the Administration Agreement or from the Administrator's bad faith, negligence, or willful misconduct in the performance of its duties under

Distributor

Foreside Fund Services, LLC (the "Distributor"), located at Three Canal Plaza, Suite 100, Portland, Maine 04101 serves as the distributor of Creation Units for the Trust on an agency basis. The Trust has entered into a Distribution Agreement with the Distributor ("Distribution Agreement"), under which the Distributor, as agent, reviews and approves orders by Authorized Participants to create and redeem Shares in Creation Units. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares will be continuously offered for sale only in Creation Units. The Distributor will deliver a prospectus to Authorized Participants purchasing Shares in Creation Units and will maintain records of confirmations of acceptance furnished by it to Authorized Participants. The Distributor has no role in determining the investment policies of any Fund or which securities are to be purchased or sold by the Fund. No compensation is payable by the Trust to the Distributor

for such distribution services. However, the Adviser has entered into an agreement with the Distributor under which it makes payments to the Distributor in consideration for its services under the Distribution Agreement. The payments made by the Adviser to the Distributor do not represent an additional expense to the Trust, a Fund or its shareholders.

The Distributor may also enter into agreements with securities dealers (“Dealers”) who will assist in the distribution of Shares. The Distributor will only enter into agreements with firms wishing to purchase Creation Units if the firm qualifies as an Authorized Participant (as discussed in “Procedures for Purchase of Creation Units” below) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of a Fund and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days’ written notice when authorized either by majority vote of its outstanding voting shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Distributor, or reckless disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

The Adviser or its affiliates, out of its own resources and not out of Fund assets (i.e., without additional cost to a Fund or its shareholders), may pay certain broker dealers, banks and other financial intermediaries (“Intermediaries”) for certain activities related to a Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including a Fund, or for other activities, such as marketing and educational training or support. These arrangements are not financed by a Fund and, thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of a Fund’s Prospectus and they do not change the price paid by investors for the purchase of Shares or the amount received by a shareholder as proceeds from the redemption of Shares. Such compensation may be paid to Intermediaries that provide services to a Fund, including marketing and education support (such as through conferences, webinars and printed communications). The Adviser periodically assesses the advisability of continuing to make these payments. Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about what investment options it will make available or recommend, and what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend a Fund over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professional if he or she receives similar payments from his or her Intermediary firm.

Intermediary information is current only as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive.

Counsel

Alston & Bird LLP, 950 F St., NW, Washington, DC, 20004 is counsel to the Trust, including the Funds.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., 1835 Market Street, Suite 310, Philadelphia, PA 19103, serves as the Trust's independent registered public accounting firm and audits each Fund's financial statements and performs other related audit services.

Compliance and Treasury Services Fee

PINE Advisors LLC ("PINE") provides compliance and treasury services to the Fund pursuant to service agreements. In consideration for these services, PINE is paid a monthly fee by the Adviser. The Adviser also reimburses PINE for certain out-of-pocket expenses.

PORTFOLIO HOLDINGS DISCLOSURE

The Board has adopted a policy regarding the disclosure of information about each Fund's portfolio securities. Under the policy, portfolio holdings of a Fund, which will form the basis for the calculation of NAV, are publicly disseminated each day a Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Creation Units, together with estimates and actual Cash Amounts is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation ("NSCC"), a clearing agency that is registered with the SEC. The basket represents one Creation Unit of a Fund. The Trust, the Adviser, Administrator, Custodian and Distributor will not disseminate non-public information concerning the Trust.

QUARTERLY PORTFOLIO SCHEDULE

The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of each Fund's portfolio holdings with the SEC on Form N-PORT. Form N- PORT for each Fund will be available on the SEC's website at <http://www.sec.gov>.

CODE OF ETHICS

The Trust and the Adviser have each adopted codes of ethics pursuant to Rule 17j-1 of the 1940 Act. These codes of ethics are designed to prevent affiliated persons of the Trust and the Adviser from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by a Fund (which may also be held by persons subject to the codes of ethics). Each Code of Ethics permits personnel subject to that Code of Ethics to invest in securities for

their personal investment accounts, subject to certain limitations, including limitations related to securities that may be purchased or held by a Fund. The Distributor (as defined below) relies on the principal underwriters exception under Rule 17j-1(c)(3), specifically where the Distributor is not affiliated with the Trust and the Adviser, and no officer, director, or general partner of the Distributor serves as an officer, director, or general partner of the Trust or the Adviser.

There can be no assurance that the codes of ethics will be effective in preventing such activities. Each code of ethics may be examined at the SEC's website at <http://www.sec.gov>.

PROXY VOTING POLICIES AND PROCEDURES

Information regarding how each Fund voted proxies related to portfolio securities during the most recent 12-month period ended June 30 is available, without charge, upon request, by calling 1-888-393-KURV (5878) or on the Funds' website, www.kurvinvest.com and on the SEC's website at <http://www.sec.gov>. Proxies for each Fund's portfolio securities are voted in accordance with the Adviser's proxy voting policies and procedures, which are set forth in Appendix A to this SAI.

The Trust is required to disclose annually each Fund's complete proxy voting record on Form N-PX covering the period July 1 through June 30 and file it with the SEC no later than August 31. Form N-PX for each Fund will be available by writing to the Trust, c/o U.S. Bancorp Fund Services, LLC at 615 East Michigan Street, Milwaukee, WI 53202. The Fund's Form N-PX will also be available on the Fund's website, www.kurvinvest.com, and on the SEC's website at www.sec.gov.

BROKERAGE TRANSACTIONS

The policy of the Trust regarding purchases and sales of securities for each Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust's policy is to pay commissions that are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude a Fund and the Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage services received from the broker effecting the transaction. Such determinations are necessarily subjective and imprecise, as in most cases, an exact dollar value for those services is not ascertainable. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, a Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When a Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable. The Trust has adopted policies and procedures

that prohibit the consideration of sales of Shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. “Best execution” is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Adviser will also use electronic crossing networks (“ECNs”) when appropriate.

Subject to the foregoing policies, brokers or dealers selected to execute a Fund’s portfolio transactions may include the Fund’s Authorized Participants (as discussed in “Procedures for Purchase of Creation Units” below) or their affiliates. An Authorized Participant or its affiliates may be selected to execute a Fund’s portfolio transactions in conjunction with an all-cash creation unit order or an order including “cash-in-lieu” (as described below under “Purchase and Redemption of Shares in Creation Units”), so long as such selection is in keeping with the foregoing policies. As described below under “Purchase and Redemption of Shares in Creation Units—Creation Transaction Fee” and “—Redemption Transaction Fee”, a Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, e.g., for creation orders that facilitate the rebalance of a Fund’s portfolio in a more tax efficient manner than could be achieved without such order, even if the decision to not charge a variable fee could be viewed as benefiting the Authorized Participant or its affiliate selected to execute a Fund’s portfolio transactions in connection with such orders.

Each Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

The Adviser is responsible, subject to oversight by the Board, for placing orders on behalf of a Fund for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of a Fund and one or more other investment companies or clients supervised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as a Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to a Fund. The primary consideration is prompt execution of orders at the most favorable net price.

In certain instances, the Adviser may find it efficient for purposes of seeking to obtain best execution, to aggregate or “bunch” certain contemporaneous purchases or sale orders of its advisory accounts and advisory accounts of affiliates. In general, all contemporaneous trades for client accounts under management by the same portfolio manager or investment team will be bunched in a single order if the trader believes the bunched trade would provide each client with an opportunity to achieve a more favorable execution at a potentially lower execution cost. The costs associated with a bunched order will be shared pro rata among the clients in the bunched order. Generally, if an order for a particular portfolio manager or management team is filled at several different prices through multiple trades, all accounts participating in the order will receive the average price (except in the case of certain international markets where average pricing is not permitted). While in some cases this practice could have a detrimental effect upon the price or value of the security as far as a Fund are concerned, in other cases it could be beneficial to the Funds. Transactions effected by Adviser or the other affiliates on behalf of more than one of its clients during the same period may increase the demand for securities being purchased or the supply of securities being sold, causing an adverse effect on price. The trader will give the bunched order to the broker-dealer that the trader has identified as being able to provide the best execution of the order. Orders for purchase or sale of securities will be placed within a reasonable amount of time of the order receipt and bunched orders will be kept bunched only long enough to execute the order.

Each Fund’s purchase and sale orders for securities may be combined with those of other investment companies, clients or accounts that the Adviser manages or advises. If purchases or sales of portfolio securities of the Funds and one or more other accounts managed or advised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the Funds and the other accounts in a manner deemed equitable to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security as far as a Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower transaction costs will be beneficial to a Fund. The Adviser may deal, trade and invest for its own account in the types of securities in which a Fund may invest. Each Fund will not deal with affiliates in principal transactions unless permitted by applicable SEC rules or regulations, or by SEC exemptive order.

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates may result in comparatively greater brokerage expenses.

As permitted by Section 28(e) of the 1934 Act, the Adviser may cause a Fund to pay a broker-dealer which provides “brokerage and research services” (as defined in the 1934 Act) to the Adviser an amount of disclosed commission or spread (sometimes called “soft dollars”) for effecting a securities transaction for the Trust in excess of the commission or spread which another broker-dealer would have charged for effecting that transaction, if the Adviser determines in good faith that the commission is reasonable given the brokerage and/or research services provided by the broker-dealer.

In selecting broker-dealers that provide research or brokerage services that are paid for with soft dollars, potential conflicts of interest may arise between the Adviser and the Trust because the Adviser does not produce or pay for these research or brokerage services, but rather uses brokerage

commissions generated by Fund transactions to pay for them. In addition, the Adviser may have an incentive to select a broker-dealer based upon the broker-dealer's research or brokerage services instead of the broker-dealer's ability to achieve best execution.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in a Fund is contained in the Prospectus under the headings "Summary Information— Principal Risks of Investing in Each Fund" with respect to the applicable Fund, "Additional Information About Each Fund's Investment Strategies and Risks—Risks of Investing in Each Fund," "Shareholder Information—Determination of NAV" and "Shareholder Information—Buying and Selling Exchange-Traded Shares." The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The Shares of each Fund are listed on an Exchange and will trade in the secondary market at prices that may differ to some degree from its NAV. The Exchange may but is not required to remove the Shares of a Fund from listing if: (1) following the initial twelve (12) month period beginning upon the commencement of trading of the Fund, there are fewer than 50 beneficial holders of the Shares for 30 or more consecutive trading days, or (2) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, an Exchange will remove the Shares from listing and trading upon termination of the Trust. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares of a Fund will continue to be met.

As in the case of other securities traded on an Exchange, brokers' commissions on transactions are based on negotiated commission rates at customary levels.

Each Fund is required by the Exchange to comply with certain listing standards (which includes certain investment parameters) in order to maintain its listing on the Exchange. Compliance with these listing standards may compel the Funds to sell securities at an inopportune time or for a price other than the security's then-current market value. The sale of securities in such circumstances could limit a Fund's profit or require a Fund to incur a loss, and as a result, the Fund's performance could be impacted.

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Shareholder Information—Buying and Selling Exchange-Traded Shares."

The Depository Trust Company ("DTC") acts as securities depository for the Shares. Shares of each Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for Shares.

DTC, a limited-purpose trust company, was created to hold securities of its participants ("DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC

Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (“Indirect Participants”).

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Shares holdings of each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

CREATION AND REDEMPTION OF CREATION UNITS

General

Each Fund will issue and sell Shares only in Creation Units on a continuous basis, without an initial sales load, at their NAV next determined after receipt, on any Business Day (as defined herein), of an order in proper form. An Authorized Participant (defined below) that is not “qualified institutional buyer,” as such term is defined under Rule 144A of the Securities Act, will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

A “Business Day” with respect to a Fund is any day on which the NYSE is open for business. As of the date of the Prospectus, the NYSE observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, President’s Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Fund Deposit

The consideration for purchase of a Creation Unit of a Fund generally consists of Deposit Cash. Each Fund may permit or require the in-kind deposit of Deposit Securities per each Creation Unit, constituting all or a portion of a Fund Deposit, computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (included in the term “Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, a Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute a Fund Deposit, which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The “Cash Component” is an amount equal to the difference between the NAV of Shares (per Creation Unit) and the value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (i.e., the NAV per Creation Unit exceeds the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (i.e., the NAV per Creation Unit is less than the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership

of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant.

Each Fund, through NSCC, makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for a Fund. Such Fund Deposit is subject to any applicable adjustments as described below, to effect purchases of Creation Units of a Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of Shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for a Fund Deposit for a Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objective of the Fund.

The Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”). The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of a Fund Deposit, resulting from certain corporate actions.

Procedures for Purchase of Creation Units

To be eligible to place orders with the Transfer Agent to purchase a Creation Unit of a Fund, an entity must be (i) a “Participating Party” (i.e., a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”)), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “Book Entry Only System”). In addition, each Participating Party or DTC Participant (each, an “Authorized Participant”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the creation transaction fee (described below), if applicable, and any other applicable fees and taxes.

All orders to purchase Shares directly from a Fund must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. The order cut-off time for each Fund for orders to purchase Creation Units is expected to be

4:00 p.m. Eastern Time, which time may be modified by the Funds from time-to-time by amendment to the Participant Agreement and/or applicable order form. In the case of custom orders, the order must be received by the Transfer Agent no later than 3:00 p.m. Eastern Time or such earlier time as may be designated by a Fund and disclosed to Authorized Participants. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the "Order Placement Date." In all circumstances, any early cut-off time will be after: (1) the NAV is calculated for the day prior to the Order Placement Date and (2) the portfolio holdings or basket information is published on the Order Placement Date.

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase Shares directly from a Fund in Creation Units have to be placed by the investor's broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, a Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund's investments are primarily traded is closed, the Fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Transfer Agent pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. On behalf of a Fund, the Transfer Agent will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Transfer Agent by the cut-off time on such Business Day. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Transfer Agent or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a sub-custody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the sub-custodian of a Fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian. Each Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the applicable Fund or its agents by no later than 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If a Fund or its agents do not receive all of the Deposit Securities, or the required Deposit Cash in lieu thereof, by such

time, then the order may be deemed rejected and the Authorized Participant shall be liable to a Fund for losses, if any, resulting therefrom. The “Settlement Date” for a Fund is generally the second Business Day after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received by the Custodian in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Transfer Agent, such canceled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the applicable Fund.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited by 2:00 p.m. or 3:00 p.m., Eastern Time (as set forth on the applicable order form), with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m. or 3:00 p.m., Eastern Time (as set forth on the applicable order form) on the Settlement Date, then the order may be deemed to be rejected and the Authorized Participant shall be liable to a Fund for losses, if any, resulting therefrom. A creation request is considered to be in “proper form” if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

Issuance of a Creation Unit

Except as provided in this SAI, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Transfer Agent and the Adviser shall be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the second Business Day following the day on which the purchase order is deemed received by the Transfer Agent. The Authorized Participant shall be liable to the applicable Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Fund Deposit as described below. In these circumstances, the initial deposit will have a value greater than the NAV of Shares on the date the order is placed in proper form since, in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which shall be maintained in a separate non-interest bearing collateral account. The Authorized Participant must deposit with the Custodian the Additional Cash Deposit, as

applicable, by 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If a Fund or its agents do not receive the Additional Cash Deposit in the appropriate amount, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to a Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the value of such Deposit Securities on the day the purchase order was deemed received by the Transfer Agent plus the brokerage and related transaction costs associated with such purchases.

The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as described below under “Creation Transaction Fee,” may be charged. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

Acceptance of Orders of Creation Units

The Trust reserves the right to reject an order for Creation Units transmitted to it by the Transfer Agent with respect to each Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining Shares ordered, would own 80% or more of the currently outstanding Shares; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (f) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units.

Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, a sub-custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Transfer Agent, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

All questions as to the number of Shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee

A fixed purchase (i.e., creation) transaction fee, payable to the Funds' custodian, may be imposed for the transfer and other transaction costs associated with the purchase of Creation Units ("Creation Order Costs"). The standard fixed creation transaction fee for each Fund is \$500, regardless of the number of Creation Units created in the transaction. Each Fund may adjust the standard fixed creation transaction fee from time to time. The fixed creation fee may be waived on certain orders if a Fund's custodian has determined to waive some or all of the Creation Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring Fund Securities from the Trust to their account or on their order.

Risks of Purchasing Creation Units

There are certain legal risks unique to investors purchasing Creation Units directly from a Fund. Because Shares may be issued on an ongoing basis, a "distribution" of Shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from a Fund, breaks them down into the constituent Shares, and sells those Shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary-market demand for Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with Shares as part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act.

Redemption. Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by a Fund through the Transfer Agent and only on a Business Day. Except upon liquidation of the Fund, the Trust will not redeem shares in amounts less than Creation Units. Investors must accumulate enough Shares in the secondary market to constitute a Creation Unit to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in

connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

With respect to each Fund, the Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the list of the names and Share quantities of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of a Fund, redemption proceeds for a Creation Unit will consist of Fund Securities - as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the NAV of Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of Fund Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee, as applicable, as set forth below. In the event that Fund Securities have a value greater than the NAV of Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

Redemption Transaction Fee

A fixed redemption transaction fee, payable to a Fund's custodian, may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units ("Redemption Order Costs"). The standard fixed redemption transaction fee for each Fund is \$500 regardless of the number of Creation Units redeemed in the transaction. Each Fund may adjust the redemption transaction fee from time to time. The fixed redemption fee may be waived on certain orders if a Fund's custodian has determined to waive some or all of the Redemption Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring Fund Securities from the Trust to their account or on their order.

Procedures for Redemption of Creation Units

Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to 4:00 p.m. Eastern Time. A redemption request is considered to be in "proper form" if (i) an Authorized Participant has transferred or caused to be transferred to the Trust's Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer

Agent does not receive the investor's Shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

The Authorized Participant must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

Additional Redemption Procedures

In connection with taking delivery of Shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or Authorized Participant acting on behalf of such shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within two business days of the trade date.

The Trust may in its discretion exercise its option to redeem such Shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that a Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares next determined after the redemption request is received in proper form (minus a redemption transaction fee, if applicable, and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). Each Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of Fund Securities but does not differ in NAV.

Redemptions of Shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and a Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an

Authorized Participant that is not a “qualified institutional buyer,” (“QIB”) as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status to receive Fund Securities.

The right of redemption may be suspended or the date of payment postponed with respect to each Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of Shares or determination of the NAV of Shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle will be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within normal settlement period.

The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with foreign market holiday schedules, will require, in certain circumstances, a delivery process longer than seven calendar days for a Fund. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for a Fund. The proclamation of new holidays, the treatment by market participants of certain days as “informal holidays” (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future.

DETERMINATION OF NET ASSET VALUE

NAV for each Fund is determined at the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open. NAV is computed by determining the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for each Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against

resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange.

If market quotations are not readily available, securities or other assets will be valued at their fair market value as determined in good faith by the Adviser as Valuation Designee subject to oversight by the Board. In these cases, a Fund's NAV will reflect certain portfolio securities' fair value rather than their market price. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security or other asset may be materially different than the value that could be realized upon the sale of that security or other asset. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to the Adviser as Valuation Designee. The Adviser may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value.

Each Fund may use independent pricing services to assist in calculating the value of the Fund's securities or other assets. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because each Fund may invest in securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the Fund does not price its shares, the value of some of the Fund's portfolio securities may change on days when you may not be able to buy or sell Fund shares.

In computing the NAV, each Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine NAV, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of a Fund's assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund's NAV is calculated based upon the NAVs of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Shareholder Information—Distributions.”

General Policies

Each Fund expects to declare and distribute all of its net investment income, if any, to shareholders as dividends at least monthly. Each Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on a Fund.

Dividend Distributions

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust.

Dividend Reinvestment Service

The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of each Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares issued by the Trust of the same Fund at NAV per Share. Distributions reinvested in additional Shares of a Fund will nevertheless be taxable to Beneficial Owners acquiring such additional Shares to the same extent as if such distributions had been received in cash.

CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

The Trust does not have information concerning the beneficial ownership of shares held in the names of Depository Trust Company (“DTC”) participants.

TAXES

The following is a summary of certain additional tax considerations generally affecting a Fund and its shareholders that are not described in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of a Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning.

This “Taxes” section is based on the Code and applicable regulations in effect on the date of this SAI. Future legislative, regulatory or administrative changes, including provisions of current law that sunset and thereafter no longer apply, or court decisions may significantly change the tax rules applicable to a Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

This is for general information only and not tax advice. All investors should consult their own tax advisors as to the federal, state, local and foreign tax provisions applicable to them.

Taxation of Each Fund

Each Fund will elect and intends to qualify each year to be treated as a separate RIC under the Code. As such, a Fund should not be subject to federal income taxes on its net investment income and capital gains, if any, to the extent that it timely distributes such income and capital gains to its shareholders. To qualify for treatment as a RIC, each Fund must distribute annually to its shareholders at least the sum of 90% of its net investment income (generally including the excess of net short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income, if any (the “Distribution Requirement”) and also must meet several additional requirements. Among these requirements are the following: (i) at least 90% of a Fund’s gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to its business of investing in such stock, securities or foreign currencies and net income derived from interests in qualified publicly traded partnerships (the “Qualifying Income Requirement”); and (ii) at the end of each quarter of a Fund’s taxable year, the Fund’s assets must be diversified so that (a) at least 50% of the value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the Fund’s total assets and to not more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (b) not more than 25% of the value of its total assets is invested, including through corporations in which a Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which a Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Diversification Requirement”).

It may not be possible for a Fund to fully implement a replication strategy or a representative sampling strategy of the Reference Index while satisfying the Diversification Requirement. Each Fund’s efforts to satisfy the Diversification Requirement may affect a Fund’s execution of its investment strategy and may cause the Fund’s return to deviate from that of the Index, and the Fund’s efforts to represent the Index using a sampling strategy, if such a strategy is used at any point, may cause it inadvertently to fail to satisfy the Diversification Requirement.

To the extent a Fund makes investments that may generate income that is not qualifying income, including certain derivatives, the Fund will seek to restrict the resulting income from such investments so that the Fund's non-qualifying income does not exceed 10% of its gross income.

Although a Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, each Fund will be subject to federal income taxation to the extent any such income or gains are not distributed. Each Fund is treated as a separate corporation for federal income tax purposes. Each Fund therefore is considered to be a separate entity in determining its treatment under the rules for RICs described herein. The requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If a Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Funds may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect, and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the Diversification Requirement where a Fund corrects the failure within a specified period of time. To be eligible for the relief provisions with respect to a failure to meet the Diversification Requirement, a Fund may be required to dispose of certain assets. If these relief provisions were not available to a Fund and it were to fail to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable to the shareholders of a Fund as ordinary income dividends, subject to the dividends received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders, subject to certain limitations. To requalify for treatment as a RIC in a subsequent taxable year, each Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which a Fund failed to qualify for tax treatment as a RIC. If a Fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay a fund-level tax on certain net built in gains recognized with respect to certain of its assets upon disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of a Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If a Fund determines that it will not qualify as a RIC, the Funds will establish procedures to reflect the anticipated tax liability in each Fund's NAV.

Each Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as "post-October losses") and certain other late-year losses.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against a RIC’s net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, Each Fund may carry a net capital loss from any taxable year forward indefinitely to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to a Fund and may not be distributed as capital gains to its shareholders. Generally, a Fund may not carry forward any losses other than net capital losses. The carryover of capital losses may be limited under the general loss limitation rules if a Fund experiences an ownership change as defined in the Code. Capital loss carry forwards will retain their character as either short-term or long-term capital losses.

Each Fund will be subject to a nondeductible 4% federal excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for the one-year period ending on October 31 of that year, subject to an increase for any shortfall in the prior year’s distribution. In order to qualify as a regulated investment company, and avoid being subject to federal income or excise taxes at the Fund level, each Fund intends to distribute substantially all of its net investment income and net realized capital gains within each calendar year as well as on a fiscal year basis (if the fiscal year is other than the calendar year), and intends to comply with other tax rules applicable to regulated investment companies.

If a Fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax to the extent any such income or gains are not distributed. Each Fund may designate certain amounts retained as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by a Fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their tax liabilities, and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their Shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits.

Taxation of Shareholders – Distributions

The distribution of investment company taxable income (as so computed) and net capital gain will be taxable to Fund shareholders regardless of whether the shareholder receives these distributions in cash or reinvests them in additional Shares.

Each Fund (or your broker) will report to shareholders annually the amounts of dividends paid from ordinary income, the amount of distributions of net capital gain, the portion of dividends which may qualify for the dividends received deduction for corporations, and the portion of dividends which may qualify for treatment as qualified dividend income, which is taxable to non-corporate shareholders at rates of up to 20%.

Distributions from each Fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares.

Qualified dividend income includes, in general and subject to certain holding period and other requirements, dividend income from taxable domestic corporations and certain foreign corporations. Subject to certain limitations, eligible foreign corporations include those incorporated in possessions of the United States, those incorporated in certain countries with comprehensive tax treaties with the United States, and other foreign corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Dividends received by a Fund from an ETF or an underlying fund taxable as a RIC or a REIT may be treated as qualified dividend income generally only to the extent so reported by such ETF, underlying fund or REIT. If 95% or more of a Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, a Fund may report all distributions of such income as qualified dividend income.

Fund dividends will not be treated as qualified dividend income if a Fund does not meet holding period and other requirements with respect to dividend paying stocks in its portfolio, and the shareholder does not meet holding period and other requirements with respect to the Shares on which the dividends were paid. Distributions by each Fund of its net short-term capital gains will be taxable as ordinary income. Distributions from the Fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares. Distributions may be subject to state and local taxes.

In the case of corporate shareholders, certain dividends received by a Fund from U.S. corporations (generally, dividends received by the Funds in respect of any share of stock (1) with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend and (2) that is held in an unleveraged position) and distributed and appropriately so reported by a Fund may be eligible for the 70% dividends-received deduction. Certain preferred stock must have a holding period of at least 91 days during the 181-day period beginning on the date that is 90 days before the date on which the stock becomes ex-dividend as to that dividend in order to be eligible. Capital gain dividends distributed to each Fund from other RICs are not eligible for the dividends-received deduction. In order to qualify for the deduction, corporate shareholders must meet the minimum holding period requirement stated above with respect to their Shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Shares, and, if they borrow to acquire or otherwise incur debt attributable to Shares, they may be denied a portion of the dividends-received deduction with respect to those Shares.

Although dividends generally will be treated as distributed when paid, any dividend declared by a Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared.

U.S. individuals with adjusted gross income (subject to certain adjustments) exceeding certain threshold amounts (\$250,000 if married filing jointly or if considered a “surviving spouse” for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases) are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” which includes taxable interest, dividends, and certain capital gains (generally including capital gain distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Shareholders who have not held Shares for a full year should be aware that a Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund’s ordinary income or net capital gain, respectively, actually earned during the applicable shareholder’s period of investment in the Fund. A taxable shareholder may wish to avoid investing in a Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder’s investment.

To the extent that a Fund makes a distribution of income received by the Fund in lieu of dividends (a “substitute payment”) with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If a Fund’s distributions exceed its earnings and profits, all or a portion of the distributions made for a taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder’s cost basis in a Fund and result in a higher capital gain or lower capital loss when Shares on which the distribution was received are sold. After a shareholder’s basis in Shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder’s Shares.

Taxation of Shareholders – Sale of Shares

A sale, redemption, or exchange of Shares may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as long-term capital gain or loss if Shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of Shares will generally be treated as short-term capital gain or loss. Any loss realized upon a taxable disposition of Shares held for six months or less will be treated as long-term capital loss, rather than short-term capital loss, to the extent of any amounts treated as distributions to the shareholder of long-term capital gain (including any amounts credited to the shareholder as undistributed capital gains). All or a portion of any loss realized upon a taxable disposition of Shares may be disallowed if substantially identical Shares are acquired (through the reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after the disposition. In such a case, the basis of the newly acquired Shares will be adjusted to reflect the disallowed loss.

The cost basis of Shares acquired by purchase will generally be based on the amount paid for Shares and then may be subsequently adjusted for other applicable transactions as required by the

Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The Internal Revenue Service (the "IRS"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot currently be deducted under the rules governing "wash sales" (for a person who does not mark-to-market its portfolio) or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will generally be treated as short-term capital gains or losses. Any loss upon a redemption of Creation Units held for six months or less may be treated as long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gain with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust, on behalf of a Fund, has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares and if, pursuant to Section 351 of the Code, a Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Trust also has the right to require the provision of information necessary to determine beneficial Share ownership for purposes of the 80% determination. If a Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss may be deductible.

Taxation of Fund Investments

Certain of a Fund's investments may be subject to complex provisions of the Code (including provisions relating to hedging transactions, straddles, integrated transactions, foreign currency contracts, forward foreign currency contracts, and notional principal contracts) that, among other things, may affect a Fund's ability to qualify as a RIC, affect the character of gains and losses

realized by a Fund (e.g., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require a Fund to mark to market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause a Fund to recognize income without a Fund receiving cash with which to make distributions in amounts sufficient to enable a Fund to satisfy the RIC distribution requirements for avoiding income and excise taxes. Each Fund intends to monitor its transactions, intends to make appropriate tax elections, and intends to make appropriate entries in its books and records in order to mitigate the effect of these rules and preserve the Fund's qualification for treatment as a RIC. To the extent a Fund invests in an underlying fund that is taxable as a RIC, the rules applicable to the tax treatment of complex securities will also apply to the underlying funds that also invest in such complex securities and investments.

Backup Withholding

Each Fund will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to backup withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to "backup withholding"; or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. tax liability. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the United States.

Foreign Shareholders

Any non-U.S. investors in a Fund may be subject to U.S. withholding and estate tax and shareholders are encouraged to consult their tax advisors prior to investing in a Fund. Foreign shareholders (i.e., nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. Each Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from a Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign

shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Unless certain non-U.S. entities that hold Shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to Fund distributions payable to such entities and with respect to redemptions and certain capital gain dividends payable to such entities after December 31, 2018. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

For foreign shareholders to qualify for an exemption from backup withholding, described above, the foreign shareholder must comply with special certification and filing requirements. Foreign shareholders in a Fund should consult their tax advisors in this regard.

Tax-Exempt Shareholders

Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k) plans, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under current law, a Fund generally serves to block UBTI from being realized by its tax-exempt shareholders with respect to their Shares of Fund income. However, notwithstanding the foregoing, tax-exempt shareholders could realize UBTI by virtue of their investment in a Fund if, for example, (i) a Fund invests in residual interests of Real Estate Mortgage Investment Conduits (“REMICs”), (ii) a Fund invests in a REIT that is a taxable mortgage pool (“TMP”) or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) Shares constitute debt-financed property in the hands of the tax-exempt shareholders within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisers. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisers regarding these issues.

Certain Potential Tax Reporting Requirements

Under U.S. Treasury regulations, if a shareholder recognizes a loss on disposition of Shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

State Tax

In those states that have income tax laws, the tax treatment of a Fund and of Fund shareholders with respect to distributions by a Fund may differ from federal tax treatment.

Tax Treatment of Portfolio Transactions

Set forth below is a general description of the tax treatment of certain types of securities, investment techniques and transactions that may apply to a Fund and, in turn, affect the amount, character and timing of dividends and distributions payable by the Fund to its shareholders. This section should be read in conjunction with the discussion above under “Description of Permitted Investments” for a detailed description of the various types of securities and investment techniques that apply to a Fund.

In General. In general, gain or loss recognized by a Fund on the sale or other disposition of portfolio investments will be a capital gain or loss. Such capital gain and loss may be long-term or short-term depending, in general, upon the length of time a particular investment position is maintained and, in some cases, upon the nature of the transaction. Property held for more than one year generally will be eligible for long-term capital gain or loss treatment. The application of certain rules described below may serve to alter the manner in which the holding period for a security is determined or may otherwise affect the characterization as long-term or short-term, and also the timing of the realization and/or character, of certain gains or losses.

Options, Futures, Forward Contracts and Hedging Transactions. In general, option premiums received by a Fund are not immediately included in the income of the Fund. Instead, the premiums are recognized when the option contract expires, the option is exercised by the holder, or a Fund transfers or otherwise terminates the option (e.g., through a closing transaction). If an option written by a Fund is exercised and a Fund sells or delivers the underlying stock, the Fund generally will recognize capital gain or loss equal to (a) the sum of the strike price and the option premium received by the Fund minus (b) the Fund’s basis in the stock. Such gain or loss generally will be short-term or long-term depending upon the holding period of the underlying stock. If securities are purchased by a Fund pursuant to the exercise of a put option written by it, the Fund generally will subtract the premium received from its cost basis in the securities purchased. The gain or loss with respect to any termination of a Fund’s obligation under an option other than through the exercise of the option and related sale or delivery of the underlying stock generally will be short-term gain or loss depending on whether the premium income received by a Fund is greater or less than the amount paid by the Fund (if any) in terminating the transaction. Thus, for example, if an option written by a Fund expires unexercised, the Fund generally will recognize short-term gain equal to the premium received.

The tax treatment of certain futures contracts entered into by a Fund as well as listed non-equity options written or purchased by the Fund on U.S. exchanges (including options on futures contracts, broad-based equity indices and debt securities) may be governed by section 1256 of the Code (“section 1256 contracts”). Gains or losses on section 1256 contracts generally are considered 60% long-term and 40% short-term capital gains or losses (“60/40”), although certain foreign currency gains and losses from such contracts may be treated as ordinary in character.

Also, any section 1256 contracts held by a Fund at the end of each taxable year (and, for purposes of the 4% excise tax, on certain other dates as prescribed under the Code) are “marked to market” with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as ordinary or 60/40 gain or loss, as applicable.

In addition to the special rules described above in respect of options and futures transactions, a Fund’s transactions in other derivative instruments (including options and forward contracts) as well as its other hedging, short sale, or similar transactions, may be subject to one or more special tax rules (including the constructive sale, notional principal contract, straddle, wash sale and short sale rules). These rules may affect whether gains and losses recognized by a Fund are treated as ordinary or capital or as short-term or long-term, accelerate the recognition of income or gains to a Fund, defer losses to the Fund, and cause adjustments in the holding periods of the Fund’s securities. These rules, therefore, could affect the amount, timing and/or character of distributions to shareholders. Moreover, because the tax rules applicable to derivative financial instruments are in some cases uncertain under current law, an adverse determination or future guidance by the IRS with respect to these rules (which determination or guidance could be retroactive) may affect whether a Fund has made sufficient distributions, and otherwise satisfied the relevant requirements, to maintain its qualification as a regulated investment company and avoid Fund-level tax.

Certain of a Fund’s investments in derivatives and foreign currency-denominated instruments, and the Fund’s transactions in foreign currencies and hedging activities, may produce a difference between its book income and its taxable income. If a Fund’s book income is less than the sum of its taxable income and net tax-exempt income (if any), the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company. If a Fund’s book income exceeds the sum of its taxable income and net tax-exempt income (if any), the distribution of any such excess will be treated as (i) a dividend to the extent of the Fund’s remaining earnings and profits (including current earnings and profits arising from tax-exempt income, reduced by related deductions), (ii) thereafter, as a return of capital to the extent of the recipient’s basis in the Shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset.

Foreign Currency Transactions. Each Fund’s transactions in foreign currencies, foreign currency-denominated debt obligations and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. This treatment could increase or decrease a Fund’s ordinary income distributions to you, and may cause some or all of the Fund’s previously distributed income to be classified as a return of capital. In certain cases, a Fund may make an election to treat such gain or loss as capital.

Wholly Owned Subsidiary. Each Fund may invest a portion of its assets in its respective Subsidiary, which will be classified as a corporation for U.S. federal income tax purposes. A foreign corporation, such as the Subsidiaries, will generally not be subject to U.S. federal income taxation unless it is deemed to be engaged in a U.S. trade or business. It is expected that each Subsidiary will conduct its activities in a manner so as to meet the requirements of a safe harbor under Section 864(b)(2) of the Internal Revenue Code (the “Safe Harbor”) pursuant to which the Subsidiary, provided it is not a dealer in stocks, securities or commodities, may engage in the

following activities without being deemed to be engaged in a U.S. trade or business: (1) trading in stocks or securities (including contracts or options to buy or sell securities) for its own account; and (2) trading, for its own account, in commodities that are “of a kind customarily dealt in on an organized commodity exchange” if the transaction is of a kind customarily consummated at such place. Thus, a Subsidiary’s securities and commodities trading activities should not constitute a U.S. trade or business. However, if certain of a Subsidiary’s activities were determined not to be of the type described in the Safe Harbor or if the Subsidiary’s gains are attributable to investments in securities that constitute U.S. real property interests (which is not expected), then the activities of the Subsidiary may constitute a U.S. trade or business, and be taxed as such.

In general, a foreign corporation that does not conduct a U.S. trade or business is nonetheless subject to tax at a flat rate of 30 percent (or lower tax treaty rate), generally payable through withholding, on the gross amount of certain U.S.-source income that is not effectively connected with a U.S. trade or business. There is presently no tax treaty in force between the U.S. and the Cayman Islands that would reduce this rate of withholding tax. Income subject to such a flat tax includes dividends and certain interest income. The 30 percent tax does not apply to U.S.-source capital gains (whether long-term or short-term) or to interest paid to a foreign corporation on its deposits with U.S. banks. The 30 percent tax also does not apply to interest which qualifies as “portfolio interest.” The term “portfolio interest” generally includes interest (including original issue discount) on an obligation in registered form which has been issued after July 18, 1984 and with respect to which the person, who would otherwise be required to deduct and withhold the 30 percent tax, received the required statement that the beneficial owner of the obligation is not a U.S. person within the meaning of the Internal Revenue Code. Under certain circumstances, interest on bearer obligations may also be considered portfolio interest.

Each Subsidiary will be considered a controlled foreign corporation (“CFC”) and the respective Fund will be required to include as income annually amounts earned by the Subsidiary during that year. A Fund will be subject to the distribution requirements described above on such Subsidiary income, whether or not the Subsidiary makes a distribution to the Fund during the taxable year. Each Fund expects its income with respect to its Subsidiary to be qualifying income. There is a risk that the IRS could issue regulations or other guidance holding, or could assert, that a Fund’s income with respect to its Subsidiary will not be considered “qualifying income” for purposes of the Fund remaining qualified as a RIC for U.S. federal income tax purposes. In such circumstances, a Fund may be required to make changes to its operations, which may reduce the Fund’s ability to gain investment exposure to commodities. Fund shareholders may also experience adverse tax consequences in such circumstances.

In addition, each Fund’s income from its Subsidiary will be treated as ordinary income. If a Fund were able to invest directly in commodity-linked derivatives, its gains and losses would generally be treated as 60% long-term and 40% short-term gain or loss, to the extent such derivatives are subject to the rules for Section 1256 futures contracts.

Each Subsidiary will be wholly owned by its respective Fund. A U.S. person who owns (directly, indirectly or constructively) 10 percent or more of the total combined voting power of all classes of stock of a foreign corporation is a “U.S. Shareholder” for purposes of the CFC provisions of the Internal Revenue Code. A foreign corporation is a CFC if, on any day of its taxable year, more

than 50 percent of the voting power or value of its stock is owned (directly, indirectly or constructively) by “U.S. Shareholders.” Because each Fund is a U.S. person that will own all of the stock of its Subsidiary, the Fund will be a “U.S. Shareholder” and the Subsidiary will be a CFC. As a “U.S. Shareholder,” a Fund will be required to include in gross income for United States federal income tax purposes all of its Subsidiary’s “subpart F income” (defined, in part, below), whether or not such income is distributed by the Subsidiary. It is expected that all of a Subsidiary’s income will be “subpart F income.” “Subpart F income” generally includes interest, original issue discount, dividends, net gains from the disposition of stocks or securities, receipts with respect to securities loans and net payments received with respect to equity swaps and similar derivatives. “Subpart F income” also includes the excess of gains over losses from transactions (including futures, forward and similar transactions) in any commodities. A Fund’s recognition of its Subsidiary’s “subpart F income” will increase the Fund’s tax basis in the Subsidiary. Distributions by a Subsidiary to its respective Fund will be tax-free, to the extent of its previously undistributed “subpart F income,” and will correspondingly reduce the Fund’s tax basis in the Subsidiary. “Subpart F income” is generally treated as ordinary income, regardless of the character of a Subsidiary’s underlying income.

In general, each “U.S. Shareholder” is required to file IRS Form 5471 with its U.S. federal income tax (or information) returns providing information about its ownership of the CFC. In addition, a “U.S. Shareholder” may in certain circumstances be required to report a disposition of shares in a Subsidiary by attaching IRS Form 5471 to its U.S. federal income tax (or information) return that it would normally file for the taxable year in which the disposition occurs. In general, these filing requirements will apply to investors of a Fund if the investor is a U.S. person who owns directly, indirectly or constructively (within the meaning of Sections 958(a) and (b) of the Internal Revenue Code) 10 percent or more of the total combined voting power of all classes of voting stock of a foreign corporation that is a CFC for an uninterrupted period of 30 days or more during any tax year of the foreign corporation, and who owned that stock on the last day of that year.

PFIC Investments. Each Fund may invest in securities of foreign companies that may be classified under the Code as PFICs. In general, a foreign company is classified as a PFIC if at least one-half of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. When investing in PFIC securities, a Fund intends to mark-to-market these securities under certain provisions of the Code and recognize any unrealized gains as ordinary income at the end of a Fund’s fiscal and excise tax years. Deductions for losses are allowable only to the extent of any current or previously recognized gains. These gains (reduced by allowable losses) are treated as ordinary income that a Fund is required to distribute, even though it has not sold or received dividends from these securities. You should also be aware that the designation of a foreign security as a PFIC security will cause its income dividends to fall outside of the definition of qualified foreign corporation dividends. These dividends generally will not qualify for the reduced rate of taxation on qualified dividends when distributed to you by a Fund. Foreign companies are not required to identify themselves as PFICs. Due to various complexities in identifying PFICs, a Fund can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for a Fund to make a mark-to-market election. If a Fund is unable to identify an investment as a PFIC and thus does not make a mark- to-market election, the Fund may be subject to U.S. federal income tax on a portion of any “excess distribution” or gain from the disposition of such shares even if such income is distributed as a taxable dividend by a

Fund to its shareholders. Additional charges in the nature of interest may be imposed on a Fund in respect of deferred taxes arising from such distributions or gains.

Securities Lending. While securities are loaned out by a Fund, the Fund generally will receive from the borrower amounts equal to any dividends or interest paid on the borrowed securities. For federal income tax purposes, payments made “in lieu of” dividends are not considered dividend income. These distributions will neither qualify for the reduced rate of taxation for individuals on qualified dividends nor the 70% dividends received deduction for corporations. Also, any foreign tax withheld on payments made “in lieu of” dividends or interest will not qualify for the pass-through of foreign tax credits to shareholders.

Investments in Securities of Uncertain Tax Character. Each Fund may invest in securities the U.S. federal income tax treatment of which may not be clear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities differs from the tax treatment expected by a Fund, it could affect the timing or character of income recognized by the Fund, requiring the Fund to purchase or sell securities, or otherwise change its portfolio, in order to comply with the tax rules applicable to regulated investment companies under the Code.

Investment in Certain ETPs and Certain Direct Fund Investments

Each Fund may invest in ETPs that are taxable as RICs under the Internal Revenue Code. Any income a Fund receives from such ETPs should be qualifying income for purposes of the 90% Test. Each Fund may also invest in one or more ETPs that are not taxable as RICs under the Internal Revenue Code and that may generate non-qualifying income for purposes of the 90% Test. Similarly, a Fund may make certain direct investments that may produce non-qualifying income for purposes of the 90% Test. The Adviser anticipates monitoring investments that may produce non-qualifying income to ensure that each Fund satisfies the 90% Test. Nevertheless, non-qualifying income of a Fund may be more than anticipated, the Fund may be unable to generate qualifying income at levels sufficient to ensure it satisfies the 90% Test, or the Fund might not be able to determine the percentage of qualifying income it derives for a taxable year until after year-end. In any such case, a Fund could fail the 90% Test and, if the relief provisions discussed above are unavailable, fail to qualify as a RIC.

Each Fund may invest in ETPs that are structured in a manner that causes income, gains, losses, credits and deductions of the ETPs to be taken into account for U.S. federal income tax purposes by those Funds whether or not any distributions are made from the ETPs to those Funds. Thus, a Fund may be required to take into account income or gains in a taxable year without receiving any cash and may have to sell assets to distribute such income or gains. Those sales will generally result in additional taxable gain or loss and may occur at a time when the Adviser would not otherwise have chosen to sell such securities.

Options, Swaps and Other Complex Securities. Each Fund and certain of the ETPs in which the Fund invest may invest in complex securities such as equity options, index options, repurchase agreements, foreign currency contracts, hedges and swaps, transactions treated as straddles for U.S. federal income tax purposes, and futures contracts. These investments may be subject to

numerous special and complex tax rules. These rules could affect a Fund's (and certain ETPs') ability to qualify as a RIC, affect whether gains and losses recognized by a Fund or ETPs are treated as ordinary income or long-term or short-term capital gain, accelerate the recognition of income to the Fund or ETPs and/or defer the Fund's or ETPs' ability to recognize losses. In turn, those rules may affect the amount, timing or character of the income distributed by a Fund.

Certain derivative investments by the Funds, such as exchange-traded products and over-the-counter derivatives may not produce qualifying income for purposes of the "90% Test" described above, which must be met in order for a Fund to maintain its status as a RIC under the Internal Revenue Code. In addition, the determination of the value and the identity of the issuer of such derivative investments are often unclear for purposes of the "Asset Test" described above. Each Fund intend to carefully monitor such investments to ensure that any non-qualifying income does not exceed permissible limits and to ensure that they are adequately diversified under the Asset Test. Each Fund, however, may not be able to accurately predict the non-qualifying income from these investments and there are no assurances that the IRS will agree with a Fund's determination of the "Asset Test" with respect to such derivatives.

With respect to any investments in STRIPS, Treasury Receipts, other zero coupon, payment-in-kind, and similar securities which are sold at original issue discount and thus do not make periodic cash interest payments, a Fund or an ETP will generally be required to include as part of its current income the imputed interest on such obligations even though a Fund or ETP has not received any interest payments on such obligations during that period.

Because each Fund intends to distribute all of its net investment income to its shareholders, the Fund may have to sell Fund securities to distribute such imputed income which may occur at a time when the Adviser would not have chosen to sell such securities and which may result in taxable gain or loss and may affect the amount and timing of distributions from the Fund.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by a Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

Each Fund may be required for federal income tax purposes to mark-to-market and recognize as income and loss for each taxable year their net unrealized gains and losses on certain futures contracts and options as of the end of the year as well as those actually realized during the year. Options on "broad based" securities indices are classified as "non-equity options" under the Internal Revenue Code. Gains and losses resulting from the expiration, exercise, or closing of such non-equity options, as well as gains and losses resulting from futures contract transactions, will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss (hereinafter, "blended gain or loss"). In addition, any non-equity option and futures contract held by a Fund on the last day of a fiscal year will be treated as sold for market value on that date, and gain or loss recognized as a result of such deemed sale will be blended gain or loss. Each Fund may be required to defer the recognition of losses on futures contracts, options contracts and swaps to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require

the Funds to mark-to-market certain types of positions in their portfolios (i.e., treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, a Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so.

In general, for purposes of the 90% Test described above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by a Fund. However, 100% of the net income derived from an interest in a “qualified publicly traded partnership” (generally, a partnership (i) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, (ii) that derives at least 90% of its income from the passive income sources specified in Internal Revenue Code section 7704(d), and (iii) that derives less than 90% of its income from the qualifying income described in (i) of the prior paragraph) will be treated as qualifying income. In addition, although in general the passive loss rules of the Internal Revenue Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

Any transactions in foreign currencies and forward foreign currency contracts will be subject to provisions of the Internal Revenue Code that, among other things, may affect the character of gains and losses realized by a Fund or an ETP (i.e., may affect whether gains or losses are ordinary or capital), may accelerate recognition of income by a Fund or an ETP and may defer Fund losses. These rules could therefore affect the character, amount and timing of distributions to the Fund’s shareholders. These provisions also may require a Fund or an ETP to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to facilitate satisfaction of the distribution requirements for avoiding the income and excise taxes.

The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from the 90% Test described above if such gains are not directly related to a Fund’s business of investing in stock or securities (or options and futures with respect to stock or securities). Accordingly, regulations may be issued in the future that could treat some or all of the Fund’s non-U.S. currency gains as non-qualifying income, thereby potentially jeopardizing a Fund’s status as a RIC for all years to which the regulations are applicable.

If a Fund owns shares in certain foreign investment entities, referred to as “passive foreign investment companies” or “PFICs,” the Fund will generally be subject to one or more of the following special tax regimes: (i) A Fund may be liable for U.S. federal income tax, and an additional interest charge, on a portion of any “excess distribution” from such foreign entity or any gain from the disposition of such shares, even if the entire distribution or gain is paid out by a Fund as a dividend to its shareholders, (ii) if a Fund were able and elected to treat a PFIC as a “qualified electing fund” or “QEF,” the Fund would be required each year to include in income, and distribute to shareholders in accordance with the distribution requirements set forth above, a Fund’s pro rata share of the ordinary earnings and net capital gains of the passive foreign investment company, whether or not such earnings or gains are distributed to the Fund, or (iii) a Fund may be entitled to

mark-to-market annually shares of the PFIC, whether or not any distributions are made to the Fund, and in such event would be required to distribute to shareholders any such mark-to-market gains in accordance with the distribution requirements set forth above. A Fund may have to distribute to its shareholders certain “phantom” income and gains such Fund accrues with respect to its investment in a PFIC in order to satisfy the Distribution Requirement and to avoid imposition of the excise tax. Such Fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules.

Short Sales

In general, gain or loss on a short sale is recognized when a Fund closes the sale by delivering the borrowed property to the lender, not when the borrowed property is sold. Gain or loss from a short sale by a Fund is generally considered as capital gain or loss to the extent that the property used to close the short sale constitutes a capital asset in the Fund’s hands. Except with respect to certain situations where the property used by a Fund to close a short sale has a long-term holding period on the date of the short sale, the gains on short sales are generally treated as short-term capital gains. These rules may also affect the holding period of “substantially identical property” held by a Fund. Moreover, a Fund’s loss on a short sale will be treated as a long-term capital loss if, on the date of the short sale, “substantially identical property” has been held by a Fund for more than one year. In general, a Fund will not be permitted to deduct payments made to reimburse the lender of securities for dividends paid on borrowed stock if the short sale is closed on or before the 45th day after the short sale is entered into.

Derivatives Strategies

The use of derivatives strategies, such as writing (selling) and purchasing options and futures contracts and entering into forward contracts, involves complex rules that will determine for income tax purposes the amount, character, and timing of recognition of the gains and losses a Fund realizes in connection therewith. Gains from the disposition of foreign currencies (except certain gains therefrom that may be excluded by future regulations), and gains from options, futures, and forward contracts a Fund derives with respect to its business of investing in securities or foreign currencies, will be treated as Qualifying Income. Each Fund will monitor its transactions, make appropriate tax elections, and make appropriate entries in its books and records when it acquires any foreign currency, option, futures contract, forward contract, or hedged investment to mitigate the effect of these rules, prevent its disqualification as a RIC, and minimize the imposition of federal income and excise taxes.

Some futures contracts (other than “securities futures contracts,” as defined in Code section 1234B(c)), foreign currency contracts, and “nonequity options” (i.e., certain listed options, such as those on a “broad-based” securities index) in which a Fund invests may be subject to Code section 1256 (collectively “section 1256 contracts”). Section 1256 contracts that a Fund holds at the end of its taxable year must be “marked-to-market” (that is, treated as having been sold at that time for their fair market value) for federal income tax purposes, with the result that unrealized gains or losses will be treated as though they were realized. Sixty percent of any net gain or loss recognized on these deemed sales, and 60% of any net realized gain or loss from any actual sales of section 1256 contracts, will be treated as long-term capital gain or loss, and the balance will be

treated as short-term capital gain or loss. These rules may operate to increase the amount that a Fund must distribute to satisfy the Distribution Requirement (i.e., with respect to the portion treated as short-term capital gain), which will be taxable to its shareholders as ordinary income when distributed to them, and to increase the net capital gain a Fund recognizes, without in either case increasing the cash available to it. A Fund may elect not to have the foregoing rules apply to any “mixed straddle” (that is, a straddle, which the Fund clearly identifies in accordance with applicable regulations, at least one (but not all) of the positions of which are section 1256 contracts), although doing so may have the effect of increasing the relative proportion of short-term capital gain (taxable as ordinary income) and thus increasing the amount of dividends it must distribute. Section 1256 contracts also may be marked-to-market for purposes of the Excise Tax.

Code section 1092 (dealing with straddles) also may affect the taxation of options, futures, and forward contracts in which a Fund may invest. That section defines a “straddle” as offsetting positions with respect to actively traded personal property; for these purposes, options, futures and forward contracts are positions in personal property. Under that section any loss from the disposition of a position in a straddle may be deducted only to the extent the loss exceeds the unrealized gain on the offsetting position(s) of the straddle. In addition, these rules may postpone the recognition of loss that otherwise would be recognized under the mark-to-market rules discussed above. The regulations under section 1092 also provide certain “wash sale” rules, which apply to transactions where a position is sold at a loss and a new offsetting position is acquired within a prescribed period, and “short sale” rules applicable to straddles. If a Fund makes certain elections, the amount, character, and timing of recognition of gains and losses from the affected straddle positions would be determined under rules that vary according to the elections made. Because only a few of the regulations implementing the straddle rules have been promulgated, the tax consequences to a Fund of straddle transactions are not entirely clear.

If a call option written by a Fund lapses (i.e., terminates without being exercised), the amount of the premium it received for the option will be short-term capital gain. If a Fund enters into a closing purchase transaction with respect to a written call option, it will have a short-term capital gain or loss based on the difference between the premium it received for the option it wrote and the premium it pays for the option it buys. If such an option is exercised and a Fund thus sells the securities or futures contract subject to the option, the premium the Fund received will be added to the exercise price to determine the gain or loss on the sale. If a call option purchased by a Fund lapses, it will realize short-term or long-term capital loss, depending on its holding period for the security or futures contract subject thereto. If a Fund exercises a purchased call option, the premium it paid for the option will be added to the basis of the subject securities or futures contract.

If a Fund has an “appreciated financial position” -- generally, an interest (including an interest through an option, futures or forward contract, or short sale) with respect to any stock, debt instrument (other than “straight debt”), or partnership interest the fair market value of which exceeds its adjusted basis -- and enters into a “constructive sale” of the position, the Fund will be treated as having made an actual sale thereof, with the result that it will recognize gain at that time. A constructive sale generally consists of a short sale, an offsetting notional principal contract or a futures or forward contract a Fund or a related person enters into with respect to the same or substantially identical property. In addition, if the appreciated financial position is itself a short sale or such a contract, acquisition of the underlying property or substantially identical property

will be deemed a constructive sale. The foregoing will not apply, however, to any Fund's transaction during any taxable year that otherwise would be treated as a constructive sale if the transaction is closed within 30 days after the end of that year and the Fund holds the appreciated financial position unhedged for 60 days after that closing (i.e., at no time during that 60-day period is the Fund's risk of loss regarding that position reduced by reason of certain specified transactions with respect to substantially identical or related property, such as having an option to sell, being contractually obligated to sell, making a short sale or granting an option to buy substantially identical stock or securities).

CAPITAL STOCK

The Trust issues Shares of beneficial interest with no par value. The Board may designate additional series of the Trust.

Each share issued by the Trust has a pro rata interest in the assets of the corresponding Fund. Shares have no pre-emptive, exchange, subscription or conversion rights and are freely transferable. Each Share is entitled to participate equally in dividends and distributions declared by the Board with respect to the relevant Fund, and in the net distributable assets of such Fund on liquidation.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder and each fractional Share has a proportional fractional vote. Shares of all Fund vote together as a single class except that if the matter being voted on affects only a particular fund it will be voted on only by that fund, and if a matter affects a particular fund differently from other Fund, that fund will vote separately on such matter. Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All Shares of the Trust have noncumulative voting rights for the election of Trustees. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Under Delaware law, shareholders of a statutory trust may have similar limitations on liability as shareholders of a corporation.

SHAREHOLDER REPORTS

The Trust will issue through DTC Participants to its shareholders' tailored shareholder reports containing summary information on a Fund's expense holdings, material changes and such other information as may be required by applicable laws, rules and regulations. Beneficial Owners also receive annually notification as to the tax status of the Trust's distributions.

Shareholder inquiries may be made by writing to the Trust at c/o U.S. Bancorp Fund Services, LLC at 615 East Michigan Street, Milwaukee, WI 53202.

FINANCIAL STATEMENTS

The Funds have not commenced investment operations and, therefore, have not produced financial statements. Once produced, you can obtain a copy of the financial statements contained in the Fund's Annual or Semi-Annual Report without charge by calling the Trust at 1-888-393-KURV (5878).

APPENDIX A: KURV INVESTMENT MANAGEMENT LLC

PROXY VOTING/CLASS ACTION LITIGATION POLICY

Background

An investment adviser owes a duty of care and loyalty to its clients with respect to monitoring corporate events and exercising proxy authority in the best interests of such clients. Kurv Investment Management LLC will adhere to Rule 206(4)-6 of the Advisers Act and applicable laws and regulations in regard to the voting of proxies. As a result, investment advisers must conduct a reasonable review into matters on which the adviser votes and to vote in the best interest of the client.

Policies and Procedures

Kurv Investment Management LLC has the authority to vote proxies with respect of securities in its managed single stock ETF funds ("Client Securities") over which Kurv Investment Management LLC has voting discretion. In such cases, Kurv Investment Management LLC will cast proxy votes in a manner that is consistent with the best interests of Kurv Investment Management LLC's clients. Where Kurv Investment Management LLC undertakes proxy voting responsibilities on behalf of multiple clients, it shall consider whether it should have different voting policies for some or all of these different clients, depending on the investment strategy and objectives of each client. These proxy voting policies and procedures are designed to deal with the complexities which may arise in cases where Kurv Investment Management LLC's interests conflict or appear to conflict with the interests of its clients and to provide a copy of proxy voting and these procedures upon client request. Kurv Investment Management LLC will also make available the record of Kurv Investment Management LLC's votes promptly upon request.

Unless contractually obligated to vote in a certain manner, Kurv Investment Management LLC will reach its voting decisions independently, after appropriate investigation. It does not generally intend to delegate its decision-making or to rely on the recommendations of any third party, although it may take such recommendations into consideration. Where Kurv Investment Management LLC deviates from the guidelines listed below, or depends upon a third party to make the decision, the reasons shall be documented. Kurv Investment Management LLC may consult with such other experts, such as CPA's, investment bankers, attorneys, etc., as it deems necessary to help reach informed decisions.

The CCO is responsible for monitoring the effectiveness of this policy.

Kurv Investment Management LLC generally will monitor proposed corporate actions and proxy issues regarding client securities and may take any of the following actions based on the best interests of its clients: (i) determine how to vote the proxies; or (ii) abstain.

In general, Kurv Investment Management LLC will determine how to vote proxies based on reasonable judgment of the vote most likely to produce favorable financial results for its clients. Proxy votes generally will be cast in favor of proposals that maintain or strengthen the shared

interests of shareholders. Proxy votes generally will be cast against proposals having the opposite effect. Kurv Investment Management LLC will always consider each side of each proxy issue.

Non-Voting of Proxies

Kurv Investment Management LLC will generally not vote proxies in the following situations:

- Proxies are received for equity securities where, at the time of receipt, Kurv Investment Management LLC's position, across all clients that it advises, is less than, or equal to, 1% of the total outstanding voting equity (an "immaterial position"); or
- Proxies are received for equity securities where, at the time of receipt, Kurv Investment Management LLC's clients no longer hold that position.

Management Proposals

Absent good reason to the contrary, Kurv Investment Management LLC will generally give substantial weight to management recommendations regarding voting. This is based on the view that management is usually in the best position to know which corporate actions are in the best interests of common shareholders as a whole.

Kurv Investment Management LLC will generally vote for routine matters proposed by issuer management, such as setting a time or place for an annual meeting, changing the name or fiscal year of the company, or voting for directors in favor of the management proposed slate. Other routine matters in which Kurv Investment Management LLC will generally vote along with company management include: appointment of auditors; fees paid to board members; and change in the board structure. Kurv Investment Management LLC will generally vote along with management as long as the proposal does not: i) measurably change the structure, management, control or operations of the company; ii) measurably change the terms of, or fees or expenses associated with, an investment in the company; and (iii) the proposal is consistent with customary industry standards and practices, as well as the laws of the state of incorporation applicable to the company. Routine matters may not necessitate the same level of analysis than non-routine matters.

Non-Routine Matters

Non-routine matters include such things as:

- Amendments to management incentive plans;
- The authorization of additional common or preferred stock;
- Initiation or termination of barriers to takeover or acquisition;
- Mergers or acquisitions;
- Changes in the state of incorporation;
- Corporate reorganizations;
- Term limits for board members; and
- "Contested" director slates.

In non-routine matters, Kurv Investment Management LLC will attempt to be generally familiar with the questions at issue. Non-routine matters will be voted on a case- by-case basis given the

complexity of many of these issues. When determining how to vote non-routine matters Kurv Investment Management LLC shall conduct an issue-specific analysis, giving consideration to the potential effect on the value of a client's investments, documentation of the analysis shall be maintained in Kurv Investment Management LLC's proxy voting files.

Processing Proxy Votes

The CCO will be responsible for determining whether each proxy is for a "routine" matter, as described above, and whether the policy and procedures set forth herein actually address the specific issue. For proxies that are not clearly "routine", Kurv Investment Management LLC, in conjunction with the CCO, will determine how to vote each such proxy by applying these policies and procedures. Upon making a decision, the proxy will be executed and returned for submission to the issuer. Kurv Investment's proxy voting record will be updated at the time the proxy is submitted. Records of all proxies, Kurv Investment Management LLC's proxy vote and related analyses, if applicable will be retained in accordance with its recordkeeping obligations.

Periodic Testing

Kurv Investment Management LLC shall evaluate compliance by periodically sampling the proxy votes it casts on behalf of its clients by sampling proxy votes that relate to proposals that are non-routine matters and require more issue-specific analysis (e.g., mergers and acquisition transactions, dissolutions, conversions, or consolidations).

Conflicts of Interest

Conflicts of interest between Kurv Investment Management LLC or a principal of Kurv Investment Management LLC and Kurv Investment Management LLC's clients with respect to a proxy issue conceivably may arise, for example, from personal or professional relationships with an issuer or with the directors, candidates for director, or senior executives of an issuer.

Potential conflicts of interest between Kurv Investment Management LLC and its clients may arise when Kurv Investment Management LLC's relationships with an issuer or with a related third party actually conflict, or appear to conflict, with the best interests of Kurv Investment Management LLC's clients.

If the issue is specifically addressed in these policies and procedures, Kurv Investment Management LLC will vote in accordance with these policies. In a situation where the issue is not specifically addressed in these policies and procedures and an apparent or actual conflict exists, Kurv Investment Management LLC shall either: i) inform clients of the conflict of interest and obtain advance consent of a majority of such clients for a particular voting decision; or ii) obtain approval of a voting decision from Kurv Investment Management LLC's CCO, who will be responsible for documenting the rationale for the decision made and voted.

In all such cases, Kurv Investment Management LLC will make disclosures to clients of all material conflicts and will keep documentation supporting its voting decisions.
